

New Strategic Resources for Community-Based Organizations

Santa Ana's Community Development Resource Network focuses on building capacity in the areas of strategic planning and grant development.

New services include: 1) grant locating software with advanced search capabilities; 2) updated social and demographic information reported at the Census Tract and Block Group level; and 3) Geographic Information System (GIS) maps which are available for community-based organizations to download for incorporation into their grant proposals. To download maps, visit <http://www.santa-ana.org/cda/ResourceNetwork1.asp> or simply complete the attached form and we'll schedule an appointment to assess your organization's grant development goals and data needs.

Yes - I'd like to schedule an appointment!
