

Street Tree Master Arterial Species Plan 2008

Street Tree Master Arterial Species notes:

This map shows the Recommended Tree Species for Primary and Secondary Arterials. However, due to continuous redevelop updates and actual field conditions the species may change. Some of these conditions are;

1. Overhead wires
2. Damaged sidewalks
3. Tree well size
4. Parkway width
5. Future development plans.

All projects were planting of trees in city parkways and or right of ways requires the Planning department or Contractor to contact the Mr. Greg Fernandez (Tree Section Supervisor) at 1-714-647-3330 for final species approval prior to ordering trees.
