SCOPE OF WORK

CITY OF SANTA ANA
REQUEST FOR PROPOSALS
FOR
PEDESTRIAN AND BICYCLE SAFETY PROGRAM
RFP NO.: 17-113

Task 1: Conduct Bike Education Classes–

Conduct three (3) bicycling basics classes in the City of Santa Ana. At least one (1) of these classes will be taught in Spanish. Bicycling Basics classes are geared towards new riders to teach them basic skills and give them confidence to begin riding a bicycle. All classes will be taught by trained League Cycling Instructors (LCIs). The target students are people who have never ridden before and/or who have not ridden since childhood. The class will help students master riding in a straight line, balancing, and shifting gears. It will emphasize starting and stopping, dodging hazards, scanning and signaling, as well as turning and yielding. Riders will learn the rules of the road for entering traffic at intersections and riding in the street. The class is designed to increase bicyclist’s safety awareness of common car/bike collisions, teach ways to prevent and avoid crashes and collisions, and emphasize the importance of helmet use when riding a bicycle. This class covers bicyclist rules of the road, basic principles of bicycling in traffic, common hazards encountered by bicyclists and how to deal with them, simple steps to ensure your bike is in good condition, and proper helmet fit and adjustment. Likewise, the rights and responsibilities of cyclists are embedded throughout the classroom and on-bike instruction to help increase the number of cyclists riding safely and legally. Each participant will receive a certificate of completion upon mastering the course. This reinforces pride and confidence in what they have learned.

Conduct three (3) adult bike education classes in the City of Santa Ana. At least one (1) of these classes will be taught in Spanish. Traffic Skills 101 is designed to increase bicyclist’s safety awareness of common car/bike collisions, teach ways to prevent and avoid crashes and collisions, and emphasize the importance of helmet use when riding a bicycle. Likewise, the rights and responsibilities of cyclists are embedded throughout the classroom and on-bike instruction to help increase the number of cyclists riding safely and legally. The classroom session offers students a theoretical explanation of vehicular cycling principles supported by relevant examples of safe cycling using audio/visual and group learning techniques. Students are required to complete the classroom session before taking the on-bike session. The on-bike session provides practical application of the theoretical element to give each student a fundamental understanding of safe, legal and effective cycling techniques to reach any destination by bicycle. Students first practice bike-handling skills and evasive maneuvers on a vacant paved area before riding on city streets in a group ride led by experienced instructors.

Following each class surveys will be conducted to collect comments and ideas from both students and instructors to improve and expand future classes.
Task 2: Organize and Host a League Cycling Instructor (LCI) Certification Seminar–

To ensure the longevity of the program one LCI Seminar will be conducted before the final month of the funding cycle, September 2018. Completion of a Traffic Skills 101 course is a prerequisite for attending the seminar. LCI candidates will be cultivated from the participants in the Traffic Skills 101 classes, especially cyclists who demonstrate knowledge and experience combined with a desire to make cycling safe and accessible for others.

Prior to the seminar, LCI candidates are required to take an open-book exam and achieve a score of 85% or greater in order to attend the seminar. The League of American Bicyclist’s assigns Coaches from among a small group of its Master Instructors who are experienced at leading Seminars and coaching others to teach safe cycling. All Seminar Coaches have at least four years-experience teaching students as LCIs, and have attended several LCI Seminars as observers and assistant coaches. Each coach has a broad knowledge of bicycle safety instruction and equipment maintenance. They are experts in the League’s Smart Cycling program. Additionally, many coaches have advanced training in bicycle mechanics, have experience with both mountain biking and road cycling, have done long-distance self-supported cycle touring, are active members of advocacy groups, and serve as officers in their local bicycle clubs.

The LCI seminar is a comprehensive train the trainer workshop that includes 25 hours of instruction, exercises and practice teaching both in the classroom and on the bike. The seminar emphasis is on how to teach bicycle safety and handling skills that provide increased comfort and confidence for new and returning cyclists and youth. During the seminar each LCI candidate is given the opportunity to practice teach parts of the Traffic Skills 101 curriculum, both in the classroom and on a vacant parking lot.

Feedback from Coaches and Peer critiques are an important part of this activity. Certified instructors can teach the League of American Bicyclists Smart Cycling classes to children as well as adults. The League’s Smart Cycling bicycle education curriculum includes Traffic Skills 101 (the basic introductory/intermediate course for adult cyclists), Traffic Skills 201 (an advanced adult course), Kids 1 (designed for parents of children under 10 years of age), and Kids 2 (designed for children age 10-14). A readily available stable of knowledgeable and experienced LCI’s will help sustain the program and foster growth and expansion to other cities within the region.

Task 3: Procure Supplies and Conduct ¡Luces Vivas! Events–

¡Luces Vivas! is an education and night light distribution program intended to make sure people riding bikes and walking in Santa Ana are doing so safely at night. When riding at night in California, a white front light and rear reflectors are required by law (CVC21201). More importantly, riding without lights and reflectors is dangerous. According to the most recent data from the National Highway Traffic Safety Administration, 69% of bicyclist fatalities in 2012 in the U.S. were in urban areas, and 48% of the bicyclist fatalities occurred between 4:00 pm and midnight (NHTSA “Traffic Safety Facts” April 2014 DOT HS 812 018). Our goal is to seek out people riding or walking without lights for various reasons, especially those who may not have the means or time to acquire lights on their own.
The City and community partners will organize ¡Luces Vivas! to meet for ten (10) street distributions at undisclosed locations throughout Santa Ana where night-time bicycle ridership and pedestrian activity is expected to be high and where the City has seen a history of incidents involving bicyclists and pedestrians at night. ¡Luces Vivas! members will stop people who are riding bikes or walking without lights in order to give them front and rear lights (which can be worn on shoes or belts of pedestrians) along with an information “spoke card” that explains the law for riding at night as well as tips they should know for night-time safety. The spoke cards are printed in English and Spanish and ¡Luces Vivas! will include at least a few members who speak Spanish (as well as female members to encourage female riders to stop). Additionally, cyclists who are not wearing helmets will be fitted and provided a helmet.

The selected consultant will be responsible for procuring 1,000 helmets and 1,000 lights that meet the OTS Buy America requirements. It is expected that 50-100 light sets and/or helmets will be distributed at each event, depending on expected bicyclist and pedestrian volume. Our goal will be to distribute all the lights and helmets allocated for each event.

**Task 4: Conduct Pedestrian and Bicycle Traffic Safety Fairs**

Conduct four (4) pedestrian and bicycle traffic safety fairs. In the spirit of a bike rodeo, the Traffic Safety Fair would teach students how to interact with the roadway and traffic. Whether they are walking or biking, the goal of the course would be to increase safety awareness and confidence of the student. The class would cover everything from using the different intersection devices, bicycling in the roadway, bicycle safety inspections, and helmet fit. The course would use a combination of simulation and hands on training to teach the student how to make safe decisions while walking or riding within the roadway. The training would utilize chalk, cardboard cut-outs, and other techniques to simulate possible roadway conditions/hazards. Classes would be conducted on a safe flat area on local public parks and/or school grounds. Age appropriate bicycles would be made available for youth that do not have their bicycle with them. Students that complete both the pedestrian and bicycle section would receive a free helmet and lights.
