Executive Summary

This report summarizes the results of an Initial Site Assessment (ISA) prepared for the Study Area of the proposed Santa Ana and Garden Grove Fixed Guideway Project (Project). The Study Area is located within the cities of Santa Ana and Garden Grove in central Orange County, California. More specifically, the Study Area encompasses a proposed, four-mile, transit corridor that extends from the intersection of Harbor Boulevard and Westminster Avenue in the City of Garden Grove, at its western terminus, to the Santa Ana Regional Transportation Center (SARTC) in the City of Santa Ana, at its eastern terminus.

The Project is currently undergoing environmental study and evaluation pursuant to the California Environmental Quality Act (CEQA) and the National Environmental Policy Act (NEPA). Four alternatives have been identified for detailed environmental review for the proposed Project: a No Build Alternative; a Transportation System Management (TSM) Alternative; and two streetcar Build Alternatives, which include Streetcar Alternative 1 (Santa Ana Boulevard/Fourth Street Couplet) and Streetcar Alternative 2 (Santa Ana Boulevard/Fifth Street and Civic Center Drive Couplet). These four alternatives are labeled as follows:

- No Build Alternative
- TSM Alternative
- Streetcar Alternative 1 (Santa Ana Boulevard/Fourth Street Couplet)
- Streetcar Alternative 2 (Santa Ana Boulevard/Fifth Street and Civic Center Drive Couplet)

The land uses within the Study Area are primarily residential and retail, industrial, and commercial. The two Build Alternatives (Streetcar Alternative 1 and Streetcar Alternative 2) examine different alignment options that would involve the construction of a new streetcar line between the intersection of Harbor Boulevard and Westminster Avenue and SARTC. The streetcars would operate within exclusive right-of-way (ROW) within a portion of the former Pacific Electric right-of-way (PE ROW) and also within city streets, along with mixed-flow traffic. While the proposed streetcar system would generally be placed within public rights-of-way, existing building and bridge structures in isolated locations are potentially impacted by some of the design options that are under evaluation as part of Streetcar Alternatives 1 and 2.

This Hazardous Waste ISA has been prepared to determine whether construction of the proposed Project improvements could be affected by any recorded or visible hazardous waste concerns and to recommend any additional work that may be needed.

This report concludes there is a potential for environmental concerns (low-to-high) associated with the construction of the proposed Project. A full Phase I Environmental Site Assessment shall be conducted for seven locations during Preliminary Engineering for the proposed Project. Additional testing shall occur at areas where additional excavation will occur (e.g., Raitt Street and the Santa Ana River). During replacement of the Santa Ana River Bridge, it is recommended that the bridge foundation piles be driven in place. Due to excavation activities,
procedures provided by Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) for identifying, handling, and disposing of hazardous materials and wastes unexpectedly encountered during project construction shall be followed. Additionally, yellow thermoplastic pavement markings and other types or colors of street or municipal markings which may contain LBP shall be collected and tested prior to construction and prior to any demolition, ACM and LBP shall be sampled and tested by a state-licensed abatement contractor in accordance with applicable State and federal regulations.

There is no potential for environmental concerns associated with the operation of the proposed Project.

This report presents the results of the ISA and conclusions regarding the environmental conditions within the ROW associated with the two Build Alternatives, which are summarized in Section 7.2.
Chapter 1 Introduction

1.1 Overview and Purpose of Study

The Study Area for the proposed Project is located in the cities of Santa Ana and Garden Grove, in Orange County, California. It encompasses a four-mile, transit corridor that would extend from the intersection of Harbor Boulevard and Westminster Avenue in the City of Garden Grove at its western terminus to SARTC in the City of Santa Ana at its eastern terminus. Figures 1-1 and 1-2 provide the Regional Location and Project Area maps, respectively.

Four alternatives have been identified for detailed environmental review for the proposed Project: a No Build Alternative; a TSM Alternative; and two streetcar Build Alternatives, which include Streetcar Alternative 1 (Santa Ana Boulevard/Fourth Street Couplet) and Streetcar Alternative 2 (Santa Ana Boulevard/Fifth Street and Civic Center Drive Couplet). A summary description for each of these alternatives is provided in Section 1.3 of this report.

The land uses within the Study Area are primarily residential and retail, industrial, and commercial. The two Build Alternatives examine different alignment options that would involve the construction of a new streetcar line between the intersection of Harbor Boulevard and Westminster Avenue and SARTC. The streetcars would operate within exclusive ROW within a portion of the former PE ROW and also within city streets, along with mixed-flow traffic. While the proposed streetcar system would be generally placed within public ROW, existing building and bridge structures in isolated locations would be potentially impacted by some of the design options that are under evaluation as part of Streetcar Alternatives 1 and 2.

The purpose of this ISA was to gather information regarding the properties near to and surrounding the potential alignments to evaluate the use and/or generation of hazardous materials and wastes within the vicinity and to evaluate the potential for contaminated conditions from current or former land uses. This ISA did not include testing for radon gas; mold; vapor and/or water intrusion; ACM or LBP; lead in drinking water or aerially-deposited lead; or sampling of soil or groundwater for existing contaminated conditions. It is possible that water intrusion may be present in a building even though there may be no readily observable indications. In addition, this ISA did not include a compliance audit.

This ISA consisted of the following tasks:

- Field reconnaissance to document current property conditions and activities at the adjacent properties. An inventory of potential contaminant sources on or adjacent to the properties was completed based on visual observations. Photographic documentation of selected properties is included as Appendix B;
- A focused regulatory agency search that included interpreting the Environmental Data Resources Inc. (EDR) (See Appendix C) computer database of county, State, and federal release sites, hazardous materials users and waste generators, landfills, existing or abandoned oil wells, and releases from subsurface pipelines;
- Santa Ana Fire Department records search;
A review of historical information sources to evaluate whether prior land uses may have used or stored hazardous materials. These sources included historical aerial photographs, historical topographic maps, and historical Sanborn® Fire Insurance Maps; and

Issuance of this report documenting the findings of the investigation.

This report presents the results of the ISA and conclusions regarding the environmental conditions within the ROW associated with the Study Area for the two Build Alternatives. The following sections summarize the Project background, describe the objectives of this ISA, and detail the scope of work.

1.2 Limitations and Exceptions

This report has been prepared for the specific purpose of evaluating the potential environmental liability associated with the Study Area of the proposed Project. No warranty, expressed or implied, is made. The conclusions presented in this report are professional opinions based solely upon indicated data described in this report, visual observations of the Study Area and site vicinity, and the interpretation of the available historical information and documents reviewed, as described in this report. They are intended exclusively for the purpose outlined herein and the site locations and project indicated.

It should be recognized that this ISA was not intended to be a definitive investigation of contamination at the Study Area, and the conclusions provided herein are not necessarily inclusive of all the possible conditions. Given that the scope of services for this investigation was limited, and because exploratory borings, soil and/or groundwater sampling, and analytical testing were not undertaken, it is possible that currently unrecognized subsurface contamination may exist within the Study Area. URS makes no representations regarding the value or marketability of the Study Area or the suitability for any particular use, and none should be inferred based on this report.

Discussions presented herein apply to the site conditions existing at the time of investigation and do not necessarily apply to site changes of which URS is unaware and has not had the opportunity to evaluate. Changes in the conditions of the Study Area may occur with time due to natural or human-related processes in the Study Area or adjacent properties. Accordingly, the findings of this report may be invalidated, wholly or in part, by changes beyond the control of URS.
1.3 Project Description

Four alternatives have been identified for the Project. These alternatives consist of a No Build Alternative, a Transportation System Management (TSM) Alternative and two streetcar Build Alternatives. The four alternatives are labeled as follows:

- No Build Alternative
- TSM Alternative
- Streetcar Alternative 1 (Santa Ana Boulevard and Fourth Street Couplet)
- Streetcar Alternative 2 (Santa Ana Boulevard/Fifth Street and Civic Center Drive Couplet)

A detailed project description is provided in Appendix D.
This page intentionally left blank.
Chapter 2  Site Description

2.1  Location

The Study Area for the proposed Project is located in the Cities of Santa Ana and Garden Grove in Orange County, California. The Study Area encompasses a four-mile, transit corridor that would extend from the intersection of Harbor Boulevard and Westminster Avenue in the City of Garden Grove at its western terminus to SARTC in the City of Santa Ana at its eastern terminus.

The Study Area lies within United States Geological Survey (USGS) Anaheim, California 7.5-Minute Series Quadrangle (photorevised, 1981); Orange, California 7.5-Minute Series Quadrangle (photorevised, 1981); Newport Beach, California 7.5-Minute Series Quadrangle (photorevised, 1981); and Tustin, California 7.5-minute Series Quadrangle (photorevised, 1981). The Study Area also lies within Township 5 South, Range 10 West, Sections 3, 10, 11 and 12, and Township 5 South, Range 9 West, Sections 7 and 8, San Bernardino Base & Meridian (SBBM). The site vicinity includes residential and retail, industrial, and commercial property.
This page intentionally left blank.
Chapter 3   Physical Setting

3.1 Regional Geology and Hydrogeology

From a geological perspective, the Study Area for the proposed Project is located in the southern portion of the Los Angeles Basin, within the Orange County Coastal Plain. The Orange County Coastal Plain is underlain by a thick sequence of Quaternary alluvial and fluvial sediments deposited primarily by the ancestral Santa Ana River. The Study Area vicinity is underlain by a mixture of sand, silt, and clay.

From a hydrogeological perspective, the Study Area for the Project is located within the Irvine Pressure Sub Basin of the Orange County Ground Water Basin. According to Gary A. Robbins, water-bearing sediments within the Study Area are generally found in a regional upper (perched) ground water zone and a regional lower (deep) ground water zone (Robbins, 1986). The regional perched ground water zone, where present, occurs within recent alluvium and stream deposits. Ground water found in the regional perched zone is of limited use owing to low yields and poor water quality due to the presence of elevated concentrations of total dissolved solids (TDS). Two aquifers have been identified within the regional deep zone. These aquifers are the Talbert aquifer, which generally occurs at a depth of about 200 feet below ground surface (bgs) and the Main aquifer, which occurs between 200 and 500 feet bgs (Robbins, 1986).
This page intentionally left blank.
Chapter 4  Site History

Assessment of the history of the Study Area for the proposed Project is based on review of historical aerial photographs from Sanborn® Fire Insurance Maps (Sanborn 2011), historical topographic maps (USGS 1981a through USGS 1981d) and pertinent regulatory databases (e.g., Environmental Data Resources, Inc. [EDR, 2011]) for the Study Area. Summaries of this information are provided below.

4.1 Historical Aerial Photographs

URS reviewed aerial photographs that were obtained from National Environmental Title Research, LLC (2011) of the Study Area vicinity for the years 1946, 1953, 1972, 2003, and 2005. A summary of the historical aerial photography review follows.

1946

The western terminus of Streetcar Alternatives 1 and 2 appears to have a farmhouse and citrus grove shown near the northeast corner of Harbor Boulevard and Westminster Avenue. Looking to the southeast, travelling southeast along the former PE ROW, the PE ROW is shown as a raised area. The Santa Ana River is shown as a natural river with a bridge over the PE ROW crossing. The surrounding land is still utilized as farmland or shown as vacant. Further to the southeast, farmland and commercial properties are shown. Along Santa Ana Boulevard, commercial and residential structures are still shown. Large commercial buildings are shown in the downtown Santa Ana area. Residences are shown east of the downtown area of Santa Ana. Toward the eastern terminus of Streetcar Alternatives 1 and 2, large commercial or farm structures with tall silos or aboveground storage tanks (ASTs) are shown (As determined in the 1949 Sanborn® maps, these features were determined to be gasoline storage tanks for Shell Oil Company).

1953

The western terminus of Streetcar Alternatives 1 and 2 appears to remain shown with a farmhouse and citrus grove near the northeast corner of Harbor Boulevard and Westminster Avenue. Looking to the southeast, the Santa Ana River remains shown as a natural river with a bridge over the PE ROW crossing. The surrounding land is still utilized as farmland or shown as vacant. Further to the southeast, farmland and commercial properties are shown. Along Santa Ana Boulevard, commercial and residential structures are shown. Large commercial buildings are shown in the downtown Santa Ana area. Residences are shown east of the downtown area of Santa Ana. Toward the eastern terminus of Streetcar Alternatives 1 and 2, increased development with large structures and ASTs remains shown.

1972

The western terminus of Streetcar Alternatives 1 and 2 appears to be shown with a gasoline service station property at the northeast corner of Harbor Boulevard and Westminster Avenue. Looking to the southeast, travelling southeast along the former PE ROW, commercial properties are shown to the north of the PE ROW and residential properties are shown to the south of the PE ROW. The Santa Ana River remains shown as a natural river. The surrounding land is
utilized as commercial or residential. Willowick Municipal Golf Course is shown south of the PE ROW and east of the Santa Ana River. Further to the southeast, an increase of commercial properties is shown. Along Santa Ana Boulevard, commercial and residential structures are shown. An increase of large commercial buildings and parking lots are shown in the Civic Center area of Santa Ana. Residences are shown east of the Civic Center. The eastern terminus of Streetcar Alternatives 1 and 2 has increased development with large structures.

**2003 and 2005**

The western terminus of Streetcar Alternatives 1 and 2 appears to be depicted with the current gasoline service station property at the northeast corner of Harbor Boulevard and Westminster Avenue. Looking to the southeast, commercial properties are shown to the north of the PE ROW and residential properties are shown to the south of the PE ROW. The Santa Ana River is shown as concrete-lined. The surrounding land is utilized as commercial or residential. Willowick Municipal Golf Course remains shown south of the PE ROW and east of the Santa Ana River. Santa Ana Unified School District buildings and an elementary school remains shown to the east of the Santa Ana River. Further to the southeast and along Santa Ana Boulevard, commercial and residential properties are shown. The Civic Center is shown with many large buildings including the Orange County Sheriff’s Department building, Women’s Jail, Men’s Jail, Santa Ana Municipal Stadium, and the Orange County Courthouse. Residences are shown east of the Civic Center. Santa Ana’s downtown area is shown as redeveloped with one-way streets and an increase of parking structures. The eastern terminus of Streetcar Alternatives 1 and 2 shows additional development, including the SARTC site.

**4.2 Historical Topographical Maps**

**1949**

The Santa Ana downtown area is fully developed with commercial and residential properties. The Orange County Courthouse and numerous churches are shown in the downtown area (currently known as the Civic Center area). A Southern Pacific Railroad line is shown at the eastern terminus (USGS, 1981c).

**1964 and 1965**

The western terminus of Streetcar Alternatives 1 and 2 is shown with a citrus grove at the northwest corner of Harbor Boulevard and Westminster Avenue. To the southeast, the Garden Grove Municipal Golf Course and a trailer park are shown, followed by the Santa Ana River. The downtown area is shown as the City-County Center (currently known as the Civic Center area). A Southern Pacific Railroad line is shown at the eastern terminus (USGS, 1981a through 1981d).

**1972**

The western terminus of Streetcar Alternatives 1 and 2 remains shown with a citrus grove at the northwest corner of Harbor Boulevard and Westminster Avenue. To the southeast, the Garden Grove Municipal Golf Course and a trailer park are shown, followed by the Santa Ana River (USGS, 1981a).
1981

The western terminus of Streetcar Alternatives 1 and 2 is shown with urban development at the northwest corner of Harbor Boulevard and Westminster Avenue. To the southeast, the Willowick Municipal Golf Course and a trailer park are shown, followed by the Santa Ana River (USGS, 1981a through 1981d).

4.3 Historical Sanborn® Fire Insurance Maps

1891

The 1891 Sanborn® maps depict large fruit packing companies, lumber companies, and a railroad company storage yard near the eastern terminus of Streetcar Alternatives 1 and 2, near Brown Street and Sixth Street. The remaining Sanborn® maps depict the land to the west of Brown Street and Sixth Street with residences, churches, and stores.

1949

The 1949 Sanborn® maps depict large fruit packing companies, machine shops, lumber companies, the Orange County Agricultural Department, Shell Oil Company with large gasoline ASTs, and a railroad company storage yard near the eastern terminus of Streetcar Alternatives 1 and 2, near Santiago Avenue and Logan Street. Located near Fourth Street and Breeden Street, two railroad depots are shown; the Southern Pacific Railroad Depot and the Atchison, Topeka and Santa Fe (AT&SF) Railroad Depot. Langley Oil Company, with approximately ten ASTs, is shown near Fifth Street and Poinsettia Street. Along Fourth Street, near Santa Ana’s downtown area, there are lumber companies, machine shops, and automotive storage yards. The remaining Sanborn® maps depict the land to the west of Brown Street and Sixth Street with residences, churches, department stores, and small stores.

1969

The 1969 Sanborn® maps depict large fruit packing companies, machine shops, lumber companies, the Orange County Highway and Refuse Divisions, the Orange County Road Department, Shell Oil Company with large gasoline ASTs, and a railroad company storage yard near the eastern terminus of Streetcar Alternatives 1 and 2, near Santiago Avenue and Logan Street. Located near Fourth Street and Breeden Street, two railroad depots are shown; the Southern Pacific Railroad Depot and the Atchison, Topeka and Santa Fe (AT&SF) Railroad Depot. Langley Oil Company is no longer shown. Along Fourth Street, near Santa Ana’s downtown area, there are lumber companies, pipe storage yards, machine shops, and automotive storage yards. The Civic Center area is shown with many large buildings including the Orange County Sheriff’s Department Headquarters, Women’s Jail, Men’s Jail, Santa Ana Municipal Stadium, Police Facilities Building, Santa Ana Public Library, and the Orange County Courthouse. The remaining Sanborn® maps depict the land to the west of Brown Street and Sixth Street with residences, churches, department stores, and small stores.
4.4 Flood Control Maps

The Flood Control Maps from the Federal Emergency Management Agency (FEMA) were requested for the Study Area for this Project from EDR, within a 0.5-mile radius, to determine whether the Study Area and adjoining properties lie within any floodplains. Floodplain boundaries were delineated for the Project in the EDR. The floodplain map of the Study Area is shown in the EDR report provided in Appendix C.

The western terminus of Streetcar Alternative 1 (Santa Ana Boulevard/Fourth Street Couplet) is located within a 100-year flood zone. The western terminus of Streetcar Alternative 2 (Santa Ana Boulevard/Fifth Street and Civic Center Drive Couplet) is located within a 100-year flood zone.
Chapter 5  Site Reconnaissance

A reconnaissance of the Study Area for the proposed Project and surrounding properties was conducted on June 9, 10, and 16, 2011. The site reconnaissance consisted of a walking and vehicle tour of the Study Area and neighboring properties. Study Area photographs are provided in Appendix B. Observations recorded during the site reconnaissance are summarized below and in the following sections.

The Study Area includes various types of land uses: residential property; retail property; industrial property; commercial property; and several undeveloped parcels of land. It should be noted that all observations were made from public ROW.

5.1 Hazardous Materials and Hazardous Wastes

Interiors of properties (buildings) were not evaluated for this ISA. Hazardous materials and/or wastes are expected to be present or previously generated at numerous sites located within the Study Area or immediately adjacent to the Study Area.

5.2 Solid Waste

Trash dumpsters were not observed within the alignment areas of Streetcar Alternatives 1 and 2 during the site reconnaissance. Trash enclosures were observed within the neighboring retail, commercial, and industrial developments. The waste transporter for the City of Santa Ana is Waste Management, Inc., and the waste transporter for the City of Garden Grove is Garden Grove Disposal.

5.3 Wastewater

Wastewater was not observed within the alignment areas of Streetcar Alternatives 1 and 2 during the site reconnaissance. However, several areas with water cisterns were observed.

5.4 Aboveground Storage Tanks

Aboveground storage tanks (ASTs) were not observed within the alignment areas of Streetcar Alternatives 1 and 2 during the site reconnaissance.

5.5 Underground Storage Tanks

There were no observations made of underground storage tanks (USTs), such as vent lines or fill pipes, within the alignment areas of Streetcar Alternatives 1 and 2 during the site reconnaissance.

5.6 Drums and Containers

Drums and containers were not visible within the alignment areas of Streetcar Alternatives 1 and 2 during the site reconnaissance.
5.7 Drains, Sumps, or Clarifiers
Drains, sumps, or clarifiers associated with waste were not observed within the alignment areas of Streetcar Alternatives 1 and 2 during the site reconnaissance. Storm drains were observed throughout the alignment areas of Streetcar Alternatives 1 and 2 along the surface streets and the drainage channels along the edge of the PE ROW.

5.8 Wells
Oil and/or gas wells were not observed within the alignment areas of Streetcar Alternatives 1 and 2 during the site reconnaissance.

5.9 Discolored/Stained Pavement/Soil and Stressed Vegetation
Discolored soil or pavement and stressed vegetation were not observed within the alignment areas of Streetcar Alternatives 1 and 2 during the site reconnaissance.

5.10 Pits, Ponds, or Lagoons
Pits, ponds, or lagoons were not observed within the alignment areas of Streetcar Alternatives 1 and 2 during the site reconnaissance.

5.11 Polychlorinated Biphenyls (PCBs)
Numerous pole-mounted transformers were observed along the alignments for Streetcar Alternatives 1 and 2 and within the neighboring properties. Concrete pad-mounted transformers were observed within the neighboring retail, industrial, and commercial developments. Stains or leaks were not observed on, or adjacent to, these transformers. Although not anticipated to be affected by the construction of the proposed Project, if transformers with PCBs are affected, they shall be collected and disposed of in accordance with current State and/or federal regulations.

5.12 Asbestos-Containing Materials (ACM)
An asbestos survey was not conducted as part of this ISA. It is anticipated that the proposed Project would potentially affect ACM in commercial and industrial building structures that would be demolished by some of the design options that are under study as part of Streetcar Alternatives 1 and 2, such as the Bridge, and O&M facility sites A and B. Prior to demolition, ACM shall be sampled and tested by a state-licensed abatement contractor in accordance with applicable State and/or federal regulations prior to any removal or demolition.

5.13 Radon
Radon is emitted by the natural breakdown and radioactive decay of uranium in rocks and soils. It may enter a structure as an off-gas by-product of building materials, in a natural gas contaminant, or in a water contaminant. Potential entry into buildings may occur through cracks in the foundation, sump pumps, areas around drainage pipes, and other openings. Once inside an enclosed space, radon can accumulate if the structure is not ventilated.
The Study Area is located within EPA-designated Radon Zone 3. Zone 3 is defined as having an average indoor radon level of less than 2.0 pico Curies per Liter (pCi/L). The EPA action level for radon is 4.0 pCi/L. Therefore, further assessment for radon does not appear warranted.

5.14 Lead

It is anticipated that the proposed Project would affect lead-based paint (LBP) in structures. Project improvements associated with certain design options examined as a part of Streetcar Alternatives 1 and 2 would include the demolition of a commercial and industrial structures in some locations. Prior to demolition, LBP shall be sampled and tested by a state-licensed abatement contractor in accordance with applicable State and/or federal regulations prior to any removal or demolition.

Yellow thermoplastic pavement markings and other types or colors of street or municipal markings may contain LBP. As such, lead-based roadway pavement markings shall be collected and tested prior to construction and, if necessary, disposed of in accordance with applicable State and/or federal regulations.
This page intentionally left blank.
Chapter 6  Government Agency Information

URS reviewed readily available records regarding past and current uses in the Study Area of the proposed Project, and reviewed the government agency database list search for potential environmental concerns at adjacent properties. The information obtained during the records review is provided in the following sections.

6.1 EDR Database Search

Information gathered from several environmental databases through EDR (refer to Appendix C) was used to evaluate whether proposed activities on or near the Study Area have the potential to create adverse environmental impacts on the Study Area. URS reviewed these EDR databases, which were compiled by federal, State, and local government agencies. The EDR databases include the following resources:

- AST - Aboveground Storage Tank Database
- CA FID UST - Facility inventory database contains active and inactive USTs
- Cortese - Former LUST Sites and Former CalSites
- Dry Cleaners - Database of Dry Cleaning facilities with EPA ID Numbers
- EMI - Toxics and Emissions Data with Air Resources Board (EMI)
- EnviroStor - TSC's Permitted Hazardous Waste Sites Database listing
- FINDS - Facility Index System/Facility Registry System
- HazNet - Facility and Manifest Data
- Hist UST - Database of sites that have been registered with the State for USTs
- LUST - Leaking Underground Storage Tank
- Prop 65 - Proposition 65 Incidents reported to the State Water Resources Control Board
- RCRA – SQG - Resource Conservation and Recovery Act Small Quantity Generators
- SWEEPS UST - Statewide Environmental Evaluation and Planning System
- Underground Storage Tank
- SWRCY - California Recycling Facility
- UST - Underground Storage Tank
- WDS - Waste Discharge System Database

It should be noted that this information is reported here as it was received from EDR, which in turn reports information as it was provided in various government databases. It is not possible to verify the accuracy or completeness of information contained in these databases. However, the use of and reliance on this information is a generally accepted practice in the conduct of environmental due diligence.

6.1.1 Database Properties

The EDR database identified a number of sites within a 0.25 mile radius of the proposed Project. Sites applicable to Streetcar Alternative 1 and Streetcar Alternative 2 are presented in Table 6-1 and Table 6-2, respectively.
**Table 6-1: EDR and Geotracker Listings Adjacent to Study Area (West to East)**

</table>
Orphan sites are sites that cannot be mapped due to poor or inadequate information provided by the agencies. The Orphan sites were reviewed for potential impacts to the Study Area. Based on the limited information provided, it appears that there are no Orphan sites located in the vicinity of the Study Area for the proposed Project.

**Initial Operable Segment (IOS)**

As identified in Section 1.3.4 of this document, Streetcar Alternatives 1 and 2 may be constructed in shorter segments due to funding constraints. Sites identified in Table 6-1 and 6-2, located west of the IOS, do not have the potential to impact the Project. These sites include: (1) ECCO Equipment, (2) Anderson Asphalt Paving Co., (3) Marco Rentals, (4) Aria Auto Repair Electric, (5) Facilities Relocation Project, (6) Santa Ana Unified School District, (7) Otsuka Elementary School, and (8) Otsuka Farms.

**6.2 Agency Contact and Properties with Potential Impact**

Additional information regarding database-listed sites and on-line sources was obtained from California’s Regional Water Quality Control Board’s (RWQCB) GeoTracker. Additionally, agency records have been requested from the RWQCB, Santa Ana Region, and the Orange County Health Care Agency (OCHCA) for a specific list of properties which 1) contain a leaking or active UST, 2) was previously active as agricultural land, 3) identified as a small quantity generator of hazardous waste, and/or 4) listed as a California Recycling Facility. Records request documentation and resulting correspondence is included in Appendix D. Sites identified by these agencies are also shown in Figure 6-1.

Further review of specific properties was conducted, due to property acquisition required for the proposed Project. Properties proposed for acquisition are listed in Table 6-3, below.

Agency Identified Hazardous Materials Sites

Source: ESRI, US Census Tiger 2000 Data from Geography Network
This page intentionally left blank.
Upon further review of these acquisition properties and sites identified through agency contact, it was determined that further analysis will be needed for the following sites:

- All Car Auto Parts/SA Recycling, 2002 and 2006 West Fifth Street (recycling center at mailing address 2006 West 5th Street, Santa Ana); and
- American Auto Wrecking, 1908 West Fifth Street (recycling center at mailing address 2006 West 5th Street, Santa Ana).

Additionally, due to the nature of activities associated with the following site, further analysis will also be needed for:

- Madison Materials, recycling facility located at 1035 East Fourth Street, Santa Ana.

Further analysis of these properties would be required regardless of selection of Streetcar Alternative 1, Streetcar Alternative 2, IOS-1, or IOS-2. However, further analysis of All Car Auto Parts/SA Recycling and American Auto Wrecking would only be required with selection of O&M Site B and further analysis of Madison Materials would only be required with selection of O&M site A.
Chapter 7 Conclusion - Standard Conditions, Avoidance, Minimization, and/or Mitigation Measures

This ISA is based on known sites listed in database records and records obtained from those agencies identified herein, and a field reconnaissance performed from readily accessible public roads or other vantage points. No survey of private properties or testing of soils or groundwater was performed.

Project improvements associated with Streetcar Alternatives 1 and 2 would involve excavation at an anticipated maximum depth of five feet below ground surface (bgs) for most of the alignment. Groundwater within most of the Study Area occurs at a depth of approximately 20 to 40 feet bgs. Therefore, the Project is not anticipated to affect groundwater.

The Project has the potential to impact properties that have been identified with past or current hazardous materials concerns by governmental agencies, as identified in Chapter 6. Standard measures and mitigation measures, as identified below, have been prepared to address potential impacts related to properties near to and surrounding the potential Project alignments.

7.1 Standard Conditions

Standard conditions which are common practice for transportation construction projects will be implemented for the proposed Project. These conditions are listed below:

- **SC-HAZ-A.** It is anticipated that the proposed Project may encounter ACM or LBP in some locations along the alignment (e.g., where property acquisitions would be necessary, where demolition of structures would occur, or within the O&M facility). Prior to any demolition, ACM and LBP shall be sampled and tested by a State-licensed abatement contractor in accordance with applicable State and/or federal regulations.

- **SC-HAZ-B.** Yellow thermoplastic pavement markings and other types or colors of street or municipal markings may contain LBP. As such, lead-based roadway pavement markings shall be collected and tested prior to construction and, if necessary, disposed of, in accordance with applicable State and/or federal regulations.

- **SC-HAZ-C.** As is the case for any project that involves excavation, there is the potential for unknown hazardous contamination to be encountered during project construction. Therefore, procedures provided by FHWA and the FTA for identifying, handling, and disposing of hazardous materials and wastes unexpectedly encountered during project construction would be followed.

7.2 Mitigation Measures

Based on the information obtained and reviewed for this ISA, coupled with site reconnaissance, several sites with positive findings for environmental hazards are recommended for further
investigation prior to approval of the final Project design drawings. Mitigation measures for these sites are as follows:

**Streetcar Alternative 1 (Santa Ana Blvd./Fourth St. Couplet) and Streetcar Alternative 2 (Santa Ana Blvd./Fifth St. and Civic Center Drive Couplet)**

- MM-HAZ-1. A full Phase I Environmental Site Assessment will be required during Preliminary Engineering for the following sites:
  - All Car Auto Parts/SA Recycling, 2002 and 2006 West Fifth Street;
  - American Auto Wrecking, 1908 West Fifth Street; and
  - Madison Materials, 1035 East Fourth Street.

  Recommendations presented in the Phase I Environmental Site Assessment, including additional studies and mitigation measures, shall be implemented.

- MM-HAZ-2. Mitigation measures recommended as a result of the ACM and LBP testing shall be implemented at the locations of concern. Examples of locations of concern include the candidate O&M facility sites.

- MM-HAZ-3. There are certain areas of the alignment at Raitt Street and the Santa Ana River where additional excavation will be required for construction. Additional testing at these locations will be required prior to Project construction.

- MM-HAZ-4. During the bridge construction over the Santa Ana River, the potential for encountering contaminated groundwater is low-to-medium. Depth to groundwater within the Santa Ana River portion of the Study Area may occur at less than 20 feet bgs. For the construction of the replacement bridge, it is recommended that the bridge foundation piles be driven in place, which will require excavation of greater than five feet.
Chapter 8  Cumulative Impacts

As is the case for any project that involves excavation, there is the potential for unknown hazardous contamination to be encountered during project construction. Procedures are in place for identifying, handling, and disposing of hazardous materials and wastes unexpectedly encountered during Project construction.

While numerous planned projects could encounter hazardous materials (See Table 8-1), these projects are subject to CEQA-level environmental review and provide provisions for handling and disposing of hazardous materials and wastes unexpectedly encountered during Project construction. Consequently, impacts to significant or potentially significant hazardous materials and wastes can typically be mitigated through project design and development. During future project design and development, these measures could lessen cumulative impacts to hazardous materials and wastes, and, therefore, cumulatively considerable impacts to hazardous materials and wastes are not expected to occur.

Project Description

The alternatives addressed in this EA/DEIR consist of a No Build Alternative, which is used as a basis for comparing the costs and benefits of the three alternatives, TSM, Streetcar 1 and Streetcar 2, each of which responds to purpose and need, study goals, and community input. Additional details are provided below.

Project Location

The Study Area is located in the Cities of Santa Ana and Garden Grove, in Orange County, California. The transit corridor is regionally located in central Orange County, California and directly accesses both the Los Angeles-San Diego (LOSSAN) rail corridor and the Pacific Electric Right-of-Way (PE ROW) rail corridor. The Study Area is generally bounded by Harbor Boulevard to the west, 17th Street/Westminster Avenue to the north, Grand Avenue to the east, and 1st Street to the south. The approximate foul-mile transit corridor extends from the Harbor Boulevard/Westminster Avenue intersection in the City of Garden Grove at its western terminus to the Santa Ana Regional Transportation Center (SARTC) in the City of Santa Ana at its eastern terminus. Figures A-1 and A-2 provide the Regional Location and Study Area maps, respectively.

No Build Alternative

The No Build Alternative includes existing conditions, as well as conditions that would be reasonably expected to occur in the foreseeable future without implementation of any of the build alternatives. The No Build Alternative provides the basis for comparing future conditions resulting from other alternatives. Conditions in the foreseeable future (through planning horizon year 2035) include projects that (1) have environmental analysis approved by an implementing agency and (2) have a funding source identified for implementation.

Other projects in the foreseeable future include:

- Implementation of the Transit Zoning Code (SD 84A and SD 84B), both project-level and program-level components, that are anticipated for build-out by 2028
- Implementation of the Station District Development Projects, which consist of a variety of residential develop projects, community open space and some limited neighborhood-serving commercial development
- Transit improvements including modest adjustments to existing local bus routes; and expanded Metrolink service
- Three, new bus rapid transit routes: (1) Harbor Boulevard Bus Rapid Transit Corridor [Costa Mesa to Fullerton, 10-minute headways, peak period]; (2) Westminster/17th Street Bus Rapid Transit Corridor [Santa Ana to Long Beach, 10-minute headways, peak period]; and (3) Bristol Street Bus Rapid Transit Corridor [Irvine Transportation Center to Brea Mall, 10-minute headways, peak period]
- Roadway improvements including the Bristol Street Widening project, which will widen Bristol Street from four to six lanes between Warner Avenue and Memory Lane, and the

• Grand Avenue Widening project, which will widen Grand Avenue from four to six lanes between 1st Street and 17th Street

**TSM Alternative**

The TSM Alternative enhances the mobility of existing transportation facilities and transit network without construction of major new transportation facilities or significantly, costly physical capacity improvements. Consistent with FTA guidelines, the TSM Alternative emphasizes low cost (i.e., small physical) improvements and operational efficiencies such as focused traffic engineering actions, expanded bus service, and improved access to transit services. Included within the TSM Alternative are modifications and enhancements to selected bus routes in the Study Area including:

- Skip-stop overlay service on 1st Street (Route 64) which includes access to SARTC
- A new route between SARTC and Harbor Boulevard/Westminster Avenue via Civic Center Drive, Bristol Street and 17th Street/Westminster Avenue, providing 10-minute peak and 20-minute off-peak service
- Expanded service span for StationLink service (Route 462) between SARTC and the Civic Center, providing 15-minute service during both peak and off-peak hours.

**Figure A-3** is a map of the proposed routes for the TSM bus network enhancements.

In addition, the following system operational improvements are included in the TSM Alternative:

- Traffic signal timing improvements at select congested locations along Santa Ana Boulevard and Civic Center Drive to provide for enhanced east-west bus flow, potential including but not limited to:
  - Main Street at Civic Center Drive
  - Broadway at Civic Center Drive
  - Flower Street at Civic Center Drive
  - Fairview Street at Civic Center Drive
  - Santa Ana Boulevard at Santiago Street
  - Santa Ana Boulevard at Lacy Street (install traffic signal)
- Real-time bus schedule information at high-volume transit stops (e.g., Flower Street and 6th Street, Santa Ana Boulevard and Main Street)
- Improvements to transit stop amenities (benches, shelters, kiosks, sidewalk connections, etc.) along the Santa Ana Boulevard and Main Street corridors
- Improvements to bicycle and pedestrian circulation to promote safe, convenient and attractive connectivity between the transit system and surrounding neighborhoods and activity centers, including accommodating bicycles on all buses, providing real time bus arrival information via internet and mobile devices, installing bicycle storage facilities at SARTC and the Harbor/Westminster stop, and providing study area maps/walking guides on all buses

Figure A-3

Transportation Systems Management (TSM) Alternative

This page intentionally left blank.
**Streetcar Alternative 1**

Streetcar Alternative 1 would utilize the PE ROW through the western half of its alignment and generally operate along Santa Ana Boulevard and 4th Street on the way to SARTC. The 4.1-mile alignment for Streetcar Alternative 1 would include 12 stations. It is anticipated that the streetcar system would operate seven days a week with 10-minute headways during peak periods and 15-minute headways during off-peak periods. The streetcars would be electrically powered using an overhead contact system and a series of TPSS located intermittently along the alignment. Although the specific vehicle has not been selected at this preliminary stage, streetcars generally have a capacity of 30 to 40 seated passengers and 80 to 90 standing passengers. *Table A-1* provides a summary description of the key physical and operational attributes of Streetcar Alternative 1 (PE ROW with Santa Ana Boulevard and 4th Street Couplet). *Figure A-4* provides a conceptual illustration of the alignment for Streetcar Alternative 1 relative to the existing street network within the Study Area.

**Sasscer Park Alignment**

In Streetcar Alternative 1, the Downtown Santa Ana segment features couplet operations with the westbound streetcar alignment on Santa Ana Boulevard and the eastbound streetcar alignment on 4th Street. For the eastbound transition from Santa Ana Boulevard to 4th Street, a direct route from Santa Ana Boulevard along a public easement on the southern edge of Sasscer Park to 4th Street has been identified in *Figure A-5*.

**Streetcar Alternative 2**

Streetcar Alternative 2 would utilize the PE ROW through the western half of its alignment and substantially operate along Santa Ana Boulevard, Civic Center Drive, and 5th Street along the eastern half of the alignment to SARTC. The operational characteristic of this alternative are identical to Streetcar Alternative 1. The differences between the two streetcar alternatives are the alignment and the fact that Streetcar 2 would have one additional station for a total of 13. *Table A-2* provides a summary description of the key physical and operational attributes of Streetcar Alternative 2 (PE ROW with Santa Ana Boulevard and 5th Street/Civic Center Drive Couplet). This table also includes station locations for comparison to station locations for Streetcar Alternative 1 shown in Table A-1, above. *Figure A-6* provides a conceptual illustration of the alignment for Streetcar Alternative 2 relative to the existing street network within the Study Area.

**Civic Center Bike Lane**

The Streetcar Alternative 2 alignment travels westbound through the Civic Center along Civic Center Drive between Spurgeon and Flower Streets. As part of the City of Santa Ana’s Complete Streets Program, and not as part of the SA-GG Fixed Guideway, the City plans to construct bicycle lanes are along Civic Center Drive. Streetcar Alternative 2 would acquire additional ROW (*Figure A-7*) in order not to preclude the westbound bike lane.

Streetcar Alternative 2 Alignment

Note: Termini for Initial Operable Segment 2 (IOS-2) are located at Raitt Street and SARTC.
Figure A-7

Civic Center Drive Bike Lane

Streetcar Alternatives Initial Operable Segments

In response to funding and phasing issues raised by fiscal constraints identified during OCTA’s long-range transportation planning process, IOSs which are shorter segments of Streetcar Alternatives 1 and 2 were developed for the SA-GG Fixed Guideway Project. The intent of the IOSs was to identify starter segments that could be constructed and operated until funding is assembled to complete the projects. Both IOS-1 and IOS-2 would terminate at Raitt Station (Raitt Street and Santa Ana Boulevard) rather than Harbor Station (Harbor Boulevard and Westminster Avenue). Both would include the same project features and design options as their respective full alignment build alternatives between Raitt Street and SARTC. These tracks would extend another hundred feet west within the PE ROW to reach the O & M Facility Site B should this site ultimately be selected for either IOS-1 or IOS-2.

The configuration of Raitt as an interim terminus station is the same for IOS-1 and IOS-2. Just over 50 spaces would be provided for station parking at Raitt within the PE ROW on an interim basis to be replaced by parking at Harbor Station upon completion of the full Project. Vehicular access to Raitt Station parking would be via Daisy Avenue.

**IOS-1 (Santa Ana Boulevard and 4th Street Couplet).** IOS-1 follows the same alignment as Streetcar Alternative 1, but terminates at Raitt Station rather than extending to Harbor Station (Figures A-8 through A-10). The IOS-1 streetcar alignment is about 2.2 miles in length. IOS-1 includes the same project features, design options, and parking scenarios as Streetcar Alternative 1 between Raitt Street and SARTC (Table A-3).

**IOS-2 (Santa Ana Boulevard/5th Street and Civic Center Drive Couplet).** IOS-2 follows the same alignment as Streetcar Alternative 2, but terminates at Raitt Station rather than extending to Harbor Station (Figures A-8 through A-10). The IOS-2 streetcar alignment is about 2.6 miles in length. IOS-2 includes the same project features and design options as Streetcar Alternative 2 between Raitt Street and SARTC (Table A-3).

**Key Attributes**

**Western Terminus Elevated Crossing**

The western terminus for both of the streetcar alternatives is located at the northeast corner of Harbor Boulevard and Westminster Avenue; the transition from the PE ROW to the western terminus site will include an elevated crossing. This crossing is illustrated in Figure A-11.

**Streetcar Stations**

The stations for each streetcar alternative alignment are located curbside adjacent to the platforms within the public ROW. They will consist of a shelter constructed substantially of transparent materials. In addition to seating, the stations will provide traveler information such as estimates of next train arrival time. The two terminus stations will include parking (approximately 52 spaces at the western terminus station; shared-use of SARTC parking for the eastern terminus station). The terminus stations and one inline station in the Downtown

area will also include ticketing machines for the convenience of passengers who may want an alternative to the on-vehicle ticketing during busy peak periods.

Streetcar Alternative 1 includes 12 stations along its 4.1-mile long alignment. Streetcar Alternative 2 includes 13 stations along its 4.5-mile long alignment. An additional station is included in Streetcar Alternative 2 compared to Streetcar Alternative 1. It is located at Flower Street and 6th Street for the westbound streetcar couplet. This is because of the distance between the directional Flower Street stations in Streetcar Alternative 2, with the eastbound stop at Santa Ana Boulevard and the corresponding westbound stop at Civic Center Drive. Additionally, Flower Street, at 6th Street, is a gateway to the Civic Center Plaza with City, County, State and federal offices, as well as the Orange County Sheriff’s Department and jail, and the Santa Ana Police Department.

Streetcar Vehicles

Two types of streetcar vehicles have been identified for use: classic European style streetcar, and the CPUC-compliant vehicle. The former would be similar to the vehicles currently in service in Portland, Oregon and Tucson, Arizona, manufactured by Oregon Ironworks. Neither the Portland vehicle nor the Tucson vehicle meet all CPUC structural requirements, and would therefore require either a waiver from the CPUC or a revision of the CPUC regulations that specifically acknowledge streetcars operating in mixed flow traffic at lower speed. The CPUC-compliant vehicle is derived from a light rail vehicle design. Light rail vehicles are typically CPUC-compliant and do not require CPUC waivers. The Siemens built “S70 short” is a CPUC-compliant vehicle. Both the Oregon Ironworks vehicle and the Siemens vehicle comply with Section 165: “Buy America” provisions of the Surface Transportation Assistance Act of 1982.

Santa Ana River Crossing

Both streetcar alternatives would utilize the PE ROW and cross over the Santa Ana River. This alignment was once used for the Pacific Electric Railway red car system and the Old Pacific Electric Santa Ana River Bridge still remains.
However, it has long been closed for use and not utilized by vehicles or pedestrians since 1950. The historic bridge is inadequate to accommodate the proposed project due to its age, size, (it was constructed as a single-track bridge), disrepair, undetermined structural integrity (both superstructure and foundation) and non-compliance with current building and safety requirements. Four design options were developed for Streetcar Alternatives 1 and 2 at the Santa Ana River Crossing.

These design options were evaluated against identified criteria (cost, feasibility, and potential impacts) to determine which were to be carried forward for evaluation in the EA/DEIR. As detailed in the Section 4(f) Resources Technical Report, Appendix D, and Bridge Design Options Technical Memorandum, Appendix N, four design options were developed for Streetcar Alternatives 1 and 2 at the Santa Ana River Crossing. One was determined feasible for carrying forward for analysis in the EA/DEIR, as illustrated in Figure A-12.

The existing bridge would remain in its current location and condition. A new single-track bridge would be constructed immediately south of the existing bridge for the fixed guideway. Through the use of gates and signaling, the single-track bridge would accommodate bi-directional fixed guideway traffic.

**Design Options**

During detailed evaluation, design options were developed to avoid identified constraints or to take advantage of specific opportunities presented along the alignments. In most cases the design options are the same for Streetcar Alternatives 1 and 2. However, where the design option is unique to a specific alternative, it is identified in the discussion. The full results of the analysis of the design options are provided in the Detailed Evaluation of Alternatives Technical Report, March 2012. Based on this technical report, the design options that have been carried into the environmental assessment are described below:

**Operations and Maintenance (O & M) Facility Site Options**

Both Streetcar Alternatives 1 and 2 would require the construction of an O & M Facility for streetcar operations. An O & M Facility is a stand-alone building which would meet the maintenance, repair, operational and storage needs of the proposed streetcar system. The O & M Facility accommodates daily and routine vehicle inspections, interior/exterior cleaning of the streetcars, preventative (scheduled) maintenance, unscheduled maintenance, and component change-outs. The proposed facility would also provide a venue for parking vehicles that are not in use and for rebuilding components.

The site for the O & M Facility would need to accommodate a building that houses both maintenance and administrative functions; provides for off-street employee parking; and provides for various functions such as outside storage of system components, vehicle washing, and local requirements for landscaping and screening. Currently, two candidates O & M Facility sites have been identified for either Streetcar Alternative 1 or 2. See Figure A-13 for the approximate locations of these sites.
Santa Ana River Crossing

Figure A-13
Candidate Sites of Operations and Maintenance Facilities

Legend:
- Study Area
- Streetcar Alternatives 1 and 2
- Streetcar Alternative 1
- Streetcar Alternative 2
- Proposed Stop
- Potential Maintenance Facility Site

This page intentionally left blank.
O & M Facility Site A (near SARTC). O & M Facility Site A is an irregularly shaped parcel slightly larger than 2.2 acres, and bordered by 6th Street to the north, 4th Street to the south, the Metrolink tracks to the east, and various industrial and commercial businesses to the west. Currently used as a waste transfer and recycling center, this site contains one primary structure with the remainder of the site used for receiving and sorting recycling materials, and parking. Figure A-14 shows the proposed location of Site A and Figure A-15 shows a conceptual layout of Site A. This site connects to either Streetcar Alternative 1 or 2 via a nonrevenue extension of track on Santiago Street for the equivalent of approximately two city blocks.

O & M Facility Site B (near Raitt Street). O & M Facility Site B is a rectangular site slightly larger than 2.4 acres. It is located west of Raitt Street and is bordered by 5th Street to the north and the PE ROW to the south. Located in an area zoned for industrial and commercial uses, this site is comprised of three parcels, two of which contain existing businesses and a combination of industrial buildings. The third parcel contains several residences. Figure A-16 shows the proposed location of Site B and Figure A-17 shows a conceptual layout of Site B. This site connects to the streetcar alignment for Streetcar Alternative 1 or 2 from the PE ROW. Motor vehicle access to the site would be to and from 5th Street.

Fourth Street Parking Scenarios
The Streetcar Alternative 1 alignment would utilize 4th Street between Ross Street and Mortimer Street in the westbound direction. From east of Ross Street to French Street, 4th Street has one travel lane in each direction with head-in diagonal parking along each side of the roadway. The diagonal parking, with vehicles exiting parking spaces by backing into the travel lane, is incompatible with reliable streetcar operations. Three design scenarios were identified to address the diagonal parking on 4th Street as described below and shown on Figure A-18.

Scenario A: Convert the diagonal parking along the south side of 4th Street, between Ross Street and French Street, to parallel parking and widen the sidewalk along the south side from 12 feet to 20 feet, and replace streetlights and landscaping. A total of 26 on-street parking spaces would be removed under this scenario.

Scenario B: Remove the diagonal parking along the south side of 4th Street, between Ross Street and French Street, and widen the sidewalk along the south side from 12 feet to 28 feet, and replace streetlights and landscaping. A total of 77 on-street parking spaces would be removed under this scenario.
Figure A-15
Operations and Maintenance Facility Site A - Conceptual Layout

Figure A-16

Operations and Maintenance Facility Site B - Location and Configuration

Figure A-17
Operations and Maintenance Facility Site B - Concept Layout

4th Street Parking Scenarios

4th Street Parking Scenario A: Convert Parking along South Side to Parallel and Widen Sidewalks to 20 Feet

4th Street Parking Scenario B: Remove Parking along South Side to and Widen Sidewalks to 28 Feet

4th Street Parking Scenario C: Remove Parking along South Side and North Side and Widen Sidewalks to 28 Feet

Scenario C: Remove the diagonal parking along both sides of 4th Street, between Ross Street and French Street, widen the sidewalks along both sides from 12 feet to 28 feet. In this scenario, only the parking removal and sidewalk widening along the south side would be included in the cost of the project. The City of Santa Ana would pursue alternative funding to construct the improvements to the north side.

Construction

Construction of either Streetcar Alternative 1 or 2 would take place on a segment-by-segment basis along the streetcar alignment, with the exception of the bridge structures and the O & M Facility. The duration of concentrated construction activities would be no more than six months at one location along the alignment. The construction approach would be the same for Streetcar Alternatives 1 and 2. Construction activities would include, but would not be limited to, site preparation, bridge structure construction, roadway and sidewalk reconstruction, laying streetcar track and embedded trackwork, and construction of an O & M Facility.

Construction hours would generally occur between 7:00 a.m. and 6:00 p.m., Monday through Friday. There are some exceptions, such as nighttime construction, where temporary street lane closures and utility work would be required. Project construction would follow the applicable local, State, and federal laws for building and safety. In addition, standard conditions would be included in project construction contracts to ensure consistency with applicable laws for traffic, noise, vibration, and dust control.

The following description summarizes the construction approach and methods that have been defined for the project at this preliminary stage of conceptual design:

- In general, all construction of tracks would be within the existing PE ROW, existing streets, or proposed future streets;
- Construction of the O & M Facility would be within one of the designated sites along the alignment, as defined in the project description as O & M Facility Sites A and B;
- The construction period is anticipated to be approximately 30 months, with major activities to be completed within the first 24-month period;
- It is anticipated that the construction activities would be staged and sequenced based on location and types of construction. The likely staging of the proposed project would include four to five segments to allow for construction crews to work in sequence, moving one team to a new location, while the next team takes over the next set of activities; and
- Two potential areas are identified as construction staging and track laydown areas:
  - The east end of the PE ROW at Raitt Street would be used as a temporary construction and welding plant and material storage sites. This location would serve as the midpoint of distribution to both east and west directions of the alignment. The welding plant would be a combined operation of flash butt welding and laydown storage to produce designated length of rail ribbons to be dragged or truck-hauled into position for embedment or attachment to ties; and
The second area is identified as land owned by the City of Santa Ana, located at the corner of 6th and Santiago Streets. Some special trackwork and pre-curved rails could be stored at this location;

- Construction of the proposed project would require the relocation of one catch basin under Alternative 2 at Flower Street and Civic Center Drive in addition to the installations of approximately 50 new catch basins to improve drainage along the alignment.

**Construction Scenario**

The project would use conventional construction techniques and equipment typical to the Southern California region and follow all applicable federal, State, and local laws for building and safety. Working hours would be varied to meet special circumstances and restrictions. Customary local practices consistent with all applicable laws would be used to control traffic, noise, vibration, erosion, and dust during construction. Design and construction would include mitigation commitments. Generally, construction would be divided into a series of often overlapping activities to minimize the construction duration and associated impacts. Table A-4 depicts a typical construction activities sequencing for an LRT project of similar scope and complexity.

### Table A-4: Typical Construction Sequence and Average Construction Time

<table>

<td>1 – 3</td>
</tr>
</tbody>
</table>

/a/ Some of these activities would be conducted in parallel.

- Some profile grade leveling, clearing, and grubbing of the PE ROW would take place during the early stages to establish grade for the ballast track sections. The duration of this activity would be two to three months;
Construction equipment would include graders, bulldozers, cranes, drill rigs, excavators, concrete-batching equipment, pumping equipment, concrete trucks, flat bed trucks, dump trucks, and rail-mounted equipment. While the final construction approach, including methods, staging, and sequencing coordination, will be determined in detail with the construction contractor, who has yet to be selected, the following describes the likely sequencing of the major construction activities. It should be noted that most of these activities overlap.

- Early work activities would include relocation of some of the private and public underground utilities identified as being in conflict with the track alignment;
- Work on the new bridge structure at Westminster Avenue and for the new Santa Ana River bridge structure would also begin early in the construction period;
- Demolition and clearing of the selected O & M Facility site would begin in the early phase of construction in order to be available for receipt and testing of the vehicles. Construction of the maintenance facility yard would also likely commence at this time;
- Prior to initiating work on the ballast track, overhead contact wire pole foundations and station foundations would be constructed to grade level. In addition, structure approach slabs, underground utilities, or subsurface structures would be constructed prior to the laying of the ballasted sections;
- Track construction would begin next for the in-street and the non-structure ballasted sections of the streetcar trackway. The steps would involve setting up the reinforcement for the concrete slab, placing the rail, boots, and ties and finally pouring track slab concrete. The following construction activities would also occur during the same 24-month timeframe as track construction:
  o Preparation for substation sites and installation of conduits, grounding mats, and substation foundations.
  o Track construction activity, including installation of special trackwork, field welds, installation of insulated joints and other special trackwork material.
  o Sidewalk improvements, platforms, pavement grading and resurfacing to the limits of the project between Raitt Street and SARTC.
  o Foundation work for new traffic signal, lighting, and overhead contact wire poles.
  o Roadway grinding and overlay operations beginning at Raitt Street and advancing eastward along the alignment; and
- The final steps of the construction work would include pavement striping, reestablishing ROW temporarily impacted by construction, landscaping, system testing, lining and surfacing of the ballasted track, and other miscellaneous finishing.

**SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

**FEDERAL RECORDS**
- The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 02/25/2011 has revealed that there are 2 CERCLIS sites within the searched area.

EXECUTIVE SUMMARY

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates, to the best of EPA’s knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 02/25/2011 has revealed that there are 5 CERC-NFRAP sites within the searched area.

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/09/2011 has revealed that there is 1 CORRACTS site within the searched area.

RCRA-TSDF: RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/11/2011 has revealed that there is 1 RCRA-TSDF site within the searched area.

RCRA-LQG: RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/11/2011 has revealed that there are 7 RCRA-LQG sites within the searched area.

EXECUTIVE SUMMARY

SCH: This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSITES category, depending on the level of threat to public health and safety or the environment they pose.

A review of the SCH list, as provided by EDR, and dated 05/10/2011 has revealed that there are 9 SCH sites within the searched area.

### EXECUTIVE SUMMARY

**SWEEPS UST: Statewide Environmental Evaluation and Planning System.** This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990’s. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 77 SWEEPS UST sites within the searched area.

CHMIRS: The California Hazardous Material Incident Report System contains information on reported hazardous material incidents, i.e., accidental releases or spills. The source is the California Office of Emergency Services.

A review of the CHMIRS list, as provided by EDR, and dated 12/31/2010 has revealed that there are 5 CHMIRS sites within the searched area.

AST: The Aboveground Storage Tank database contains registered ASTs. The data come from the State Water Resources Control Board’s Hazardous Substance Storage Container Database.

A review of the AST list, as provided by EDR, and dated 08/01/2009 has revealed that there are 7 AST sites within the searched area.

Notify 65: Listings of all Proposition 65 incidents reported to counties by the State Water Resources Control Board and the Regional Water Quality Control Board. This database is no longer updated by the reporting agency.

A review of the Notify 65 list, as provided by EDR, and dated 10/21/1993 has revealed that there are 5 Notify 65 sites within the searched area.

DEED: The use of recorded land use restrictions is one of the methods the DTSC uses to protect the public from unsafe exposures to hazardous substances and wastes.

A review of the DEED list, as provided by EDR, and dated 03/18/2011 has revealed that there are 2 DEED sites within the searched area.
**EXECUTIVE SUMMARY**

VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have requested that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC’s costs.

A review of the VCP list, as provided by EDR, and dated 05/10/2011 has revealed that there is 1 VCP site within the searched area.

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family commercial; garment pressing and cleaners’ agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholstery cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, and dated 09/15/2010 has revealed that there is 1 DRYCLEANERS site within the searched area.

**HAZNET:** The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2009 has revealed that there are 167 HAZNET sites within the searched area.

EMI: Toxics and criteria pollutant emissions data collected by the ARB and local air pollution agencies. A review of the EMI list, as provided by EDR, and dated 12/31/2008 has revealed that there are 22 EMI sites within the searched area.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SIMBRP's) Envirotstor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. Envirotstor provides similar information to the information that was available in CAlSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the Envirotstor list, as provided by EDR, and dated 05/10/2011 has revealed that there are 28 ENVIROSTOR sites within the searched area.
### EXECUTIVE SUMMARY

**HWT**: A listing of hazardous waste transporters. In California, unless specifically exempted, it is unlawful for any person to transport hazardous wastes unless the person holds a valid registration issued by DTSC. A hazardous waste transporter registration is valid for one year and is assigned a unique registration number.

A review of the HWT list, as provided by EDR, and dated 04/19/2011 has revealed that there are 2 HWT sites within the searched area.

### EDR PROPRIETARY RECORDS

Manufactured Gas Plants: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR’s researchers. Manufactured gas sites were used in the United States from the 1800’s to 1950’s to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste.

Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the Manufactured Gas Plants list, as provided by EDR, has revealed that there are 2 sites within the searched area.

**Reclamation:** Not reported  
**POTW:** Not reported

**Treat To Water:** Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not all runoff without a TTVQ will be considered a minor threat to water quality unless codified at a higher level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

**Complexity:** Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

- **Waste description:** A solid waste having a pH of less than 2 or greater than 12.5 is considered to be a corrosive hazardous waste. Sodium hydroxide, a caustic solution with a high pH, is often used by industries to clean or degrease parts. Hydrochloric acid, a solution with a low pH, is used by many industries to clean metal parts prior to painting. When these caustic or acid solutions become contaminated and must be disposed, the waste would be a corrosive hazardous waste.

Environmental Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CA WDS:

Facility ID: Santa Ana River 30016674
Facility Type: Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)
Facility Status: Active - Any facility with a continuous or seasonal discharge that is

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All events without a TSWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water discharges or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTSDATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information on over 300 listed toxic chemicals that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA’s programs. The vision for ICIS is to replace EPA’s independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all EPA ID NumberDatabase(s) Site Distance (ft.)

Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include: Incident Tracking, Compliance Assistance, and Compliance Monitoring.

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No
The page contains tables and data related to environmental site assessments and investigations. The tables include information such as facility names, dates of violation, area of violation, and enforcement actions taken. The text also discusses the California Hazardous Waste Tracking System (HWTS-DATAMART) and the Resource Conservation and Recovery Act (RCRA) program. The data is formatted in a structured manner, typical of environmental documentation.

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxic Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that those facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

---

**Correction:** The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs). This information is essential for understanding pollution sources and trends. The NEI is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo is a critical tool for ensuring compliance with RCRA regulations.

### Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

- **RCRA Info** is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRA Info allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ALL VARIETY METALS
1016 SANTIAGO AVE
SANTA ANA, CA 92701

CA WDS:
Facility ID: Santa Ana River 30015238
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS00001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 8
Facility Telephone: T148395225
Facility Contact: MARIO GUTIERREZ
Agency Name: GUTIERREZ JAIME

Reclamation: Not reported
POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not. All nitrates without a TTWQ will be considered a minor threat to water quality unless cuffed at a higher Level. A zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Registry ID: 110002737655

Environmental Interest/Information System:

RCAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCAInfo allows RCRAInfo program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Public Information Officer: Not reported
Facility Status: No files on this facility could be found. Per Project Manager Robert Romers, this is the History of the facility. The facility requires corrective action. DTSC requested an RFI workshop from the facility. Three submitting were received, and all were found to be grossly deficient (last one received in 201). The facility has been handled by the Geology, Permitting, and Corrective Action Branch (GPCAB) and Tiered Permitting Branch at different times. GPCAB has taken no further action on the facility because enforcement action has not been effective in producing an acceptable workshop. We have no information on the permitting status of the site (whether this site was RCRA or Tiered Permitting). Tiered permitting group was asked about this facility and they stated this site was not on their list of facilities. Also contacted Orange County CUPA program. Per OC CUPA program, this facility had past issues with illegal dumping and was fined. However, no record of this facility being Tiered Permit facility. Database could not be updated because no files available.

Environmental Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

- **Phone Number:** Not reported

**Site History:**
- **Type:** Aquifer used for drinking water supply
- **Contaminants:** Gasoline
- **Soil:** LPH historically observed offsite beneath residential neighborhood removed, high BTX persists despite numerous remedies. Risk evaluation suggests no vapor intrusion despite high BTX. Nevertheless, low risk closure can not be considered absent further reductions in contaminant levels and/or extensive public notification. Low income immigrant neighborhood introduces potential env. justice issues.

#### Corrective Action Activities Required Under RCRA

- Underground injection activity: No
- On-site burner exemption: No
- Furnace exemption: No
- Used oil fuel burner: No
- Used oil processor: No
- User oil reclaimer: No
- Used oil fuel marketer to burner: No
- Used oil specification marketer: No
- Used oil transfer facility: No
- Used oil transporter: No

**Hazardous Waste Summary:**
- Waste code: D001
  - Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
- Waste code: D018
  - Waste name: BENZENE
- Violation Status: No violations found

**FINDS:**
- Registry ID: 110012202004
- Environmental Interest/Information System

- California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

- RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo enables RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

### THRIFTY OIL #376

#### Status Data:
- Lead Agency: SANTA ANA RWQCB (REGION 8)
- Case Worker: VJB
- Local Agency: Not reported
- RQ Case Number: 0803010737
- LOC Case Number: Not reported
- File Location: Not reported
- Site History: Aquifer used for drinking water supply
- Site History: High BTEX/TBA persist despite historic DPE/P&T. System expansion completed to mitigate shallow/deeper impacts. Corrective action ongoing.

**Click here to access the California GeoTracker records for this facility:**

**Hazardous Waste Summary:**

- **Waste code:** D001
- **Waste name:** IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

- **Waste code:** D002
- **Waste name:** A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSION HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSION HAZARDOUS WASTE.

| **Description:** | **Handler generates more than 100 kg of hazardous waste during any calendar month and accumulates more than 6000 kg of hazardous waste at any time** | | | |

### Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

**Contact country:** US  
**Contact telephone:** (714) 835-3649  
**Contact email:** Not reported  
**EPA Region:** 09  
**Classification:** Small Small Quantity Generator  
**Description:** Handler generates more than 100 and less than 1000 kg of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time for the calendar year.

**Owner/Operator Summary:**  
**Owner/operator name:** LIEBERT MORTON  
**Owner/operator address:** NOT REQUIRED, ME 99999  
**Owner/operator telephone:** (415) 555-1212  
**Owner/Operator Type:** Private  
**Owner/Operator start date:** Not reported  
**Owner/Operator end date:** Not reported  

**Handler Activities Summary:**  
- U.S. importer of hazardous waste: No  
- Mixed waste (haz. and radioactive): No  
- Recycler of hazardous waste: No  
- Transporter of hazardous waste: No  
- Treater, storer or disposer of HW: No  
- Underground injection activity: No  
- On-site burner exemption: No  
- Furnace exemption: No  
- Used oil fuel burner: No  
- Used oil processor: No  
- User oil refinery: No  
- Used oil fuel marketer to burner: No  
- Used oil Specification marketer: No  
- Used oil transfer facility: No  
- Used oil transporter: No  
- Violation Status: No violations found

**FINDS:**  
**Registry ID:** 110002681189

**Environmental Interest/Information System**  
RCRAinfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, treat, store, or dispose of hazardous waste. RCRAinfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

- **Gen County:** Orange
- **TSD EPA ID:** Not reported
- **TSD County:** Los Angeles

**Hazardous Waste Summary:**

**Waste code:** D002

**Waste name:** A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

**Violations:**

- **No violations found**

**Environmental Interest/Information System (ERIS):**

- **Registry ID:** 110012244758

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities. 

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

### TC3089582.1s Page 471 of 993
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The Handler Activities Summary includes the following:
- **Small Small Quantity Generator:**
  - Generates more than 100 and less than 1000 kg of hazardous waste during any calendar month and accumulates less than 6000 kg of hazardous waste at any time; or generates 100 kg or less of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time.

Other details include:
- **Owner/Operator Summary:**
  - **Owner/Operator name:** THONGLY NOV
  - **Owner/operator address:** NOT REQUIRED, ME 99999
  - **Owner/operator country:** NOT REQUIRED
  - **Owner/operator telephone:** (415) 555-1212

Environmental Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Map Findings:

**Owner/Operator Summary:**
- **Owner/operator name:** THE PACIFIC TELEPHONE AND TELEGRAPH CO
- **Owner/operator address:** NOT REQUIRED
- **Owner/operator country:** NOT REQUIRED, ME 99999
- **Legal status:** Private
- **Owner/Operator Type:** Operator
- **Owner/Op start date:** Not reported
- **Owner/Op end date:** Not reported

** Handler Activities Summary:**
- **U.S. importer of hazardous waste:** No
- **Mixed waste (haz. and radioactive):** No
- **Recycler of hazardous waste:** No
- **Transporter of hazardous waste:** No
- **Treater, storer or disposer of HW:** No
- **Underground injection activity:** No
- **On-site burner exemption:** No
- **Furnace exemption:** No
- **Used oil fuel burner:** No
- **Used oil processor:** No
- **Used oil refiner:** No
- **Used oil fuel marketer to burner:** No
- **Used oil Specification marketer:** No
- **Used oil transfer facility:** No
- **Used oil transporter:** No

**Historical Generators:**
- **Date form received by agency:** 01/09/1981
- **Facility name:** PACIFIC BELL
- **Classification:** Large Quantity Generator
- **Violation Status:** No violations found

**FINDS:**

| EPA Region: | 09 | | | | |
| Classification: | Small Small Quantity Generator | | | | |
| Description: | Handler generates more than 100 and less than 1000 kg of hazardous waste during any calendar month and accumulates less than 6000 kg of hazardous waste at any time; or generates 100 kg or less of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time | | | | |

### Handler Activities Summary:
- U.S. Importer of hazardous waste: No
- Mixed waste (haz. and radioactive): No
- Recycler of hazardous waste: No
- Transporter of hazardous waste: No
- Treatment of hazardous waste: No
- Tracer, storer or disposer of HW: No
- Underground injection activity: No
- On-site burner exemption: No
- Furnace exemption: No
- Used oil fuel burner: No
- Used oil processor: No
- User oil refiner: No
- Used oil marketer to burner: No
- Used oil Specification marketer: No
- Used oil transfer facility: No
- Used oil transporter: No

### Violation Status:
- No violations found

47 AMERICAN AUTO WRECKING
1908 W 5TH ST
SANTA ANA, CA 92703

CA FID: WDS
NPDES: N/A
HAZNET:

Facility ID: Santa Ana River 30015939
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.

Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.

NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board

Subregion: 8
Facility Telephone: 7145479368
Facility Contact: VICTOR ALONSO
Agency Name: P A W SALVAGE INC
Agency Address: 1908 W 5TH ST
Agency City,St,Zip: SANTA ANA 92703
Agency Contact: VICTOR ALONSO
Agency Telephone: 7145479368
Agency Type: Private
SIC Code: 0
SIC Code 2: Not reported
Primary Waste Type: Not reported
Primary Waste: Not reported
Secondary Waste Type: Not reported
Secondary Waste: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: Not reported
POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not All runoffs without a TTQW will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as stropic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

**EPA ID Number:** CAD962502866

**Facility Name:** A & M METALS INC

**Classification:** Small Quantity Generator

**Date Form Received by Agency:** 09/01/1996

**Facility Address:** 2301 E FIFTH ST

**EPA Region:** 09

**Land Type:** Facility is not located on Indian land. Additional information is not known.

**Description:** Handler generates more than 100 and less than 1000 kg of hazardous waste during any calendar month and accumulates less than 6000 kg of hazardous waste at any time; or generates 100 kg or less of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time

**Owner/Operator Summary:**

- **Owner/Operator Name:** HAN PETER
- **Owner/Operator Address:** NOT REQUIRED
- **Owner/Operator City:** SANTA ANA

**Handler Activities Summary:**

- **U.S. Importer of Hazardous Waste:** No
- **Mixed Waste (Haz. and Radioactive):** No

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Used oil refiner: No
Used oil processor: No
Used oil fuel burner: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel marketer to burner: No
User of oil burner: No
Recycler of hazardous waste: No
Transporter of hazardous waste: No

RECOMMENDATIONS:
No violations found

Evaluation Action Summary:
Evaluation date: 11/01/1994
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: Not reported
Date achieved compliance: Not reported
Evaluation lead agency: State Contractor/Grantee

FINDS:
Registry ID: 110002642052

Environmental Interest/Information System
The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

#### Hazardous Waste Summary:

**Waste code: D001**
- **Waste name:** Ignitable Hazardous wastes are those wastes which have a flashpoint of less than 140 degrees Fahrenheit as determined by a Pensky-Martens closed cup flash point tester. Another method of determining the flash point of a waste is to review the material safety data sheet. Which can be obtained from the manufacturer or distributor of the material. Lacquer thinner is an example of a commonly used solvent which would be considered as ignitable hazardous waste.

**Waste code: D002**
- **Waste name:** A waste which has a PH of less than 2 or greater than 12.5 is considered to be a corrosive hazardous waste. Sodium hydroxide, a caustic solution with a high PH, is often used by industries to clean or degrease parts. Hydrochloric acid, a solution with a low PH, is used by many industries to clean metal parts prior to painting. When these caustic or acid solutions become contaminated and must be disposed, the waste would be a corrosive hazardous waste.

**Waste code: D003**
- **Waste name:** A material is considered to be a reactive hazardous waste if it is normally unstable, reacts violently with water, generates toxic gases when exposed to water or corrosive materials, or if it is capable of detonation or explosion when exposed to heat or a flame. One example of such waste would be waste gunpowder.

**Waste code: D009**
- **Waste name:** Tetrachloroethylene

**Waste code: F001**
- **Waste name:** The following spent halogenated solvents used in degreasing:
  - Tetrachloroethylene
  - Trichloroethylene
  - Methylene chloride
  - 1,1,1-Trichloroethylene
  - Carbon tetrachloride
  - Chlorinated fluorocarbons
  - All spent solvent mixtures/blends used in degreasing containing, before use, a total of ten percent or more (by volume) of one or more of the above halogenated solvents or those solvents listed in F002, F004, and F005, and still bottoms from the recovery of these spent solvents and spent solvent mixtures.

**Waste code: F007**
- **Waste name:** Spent cyanide plating bath solutions from electroplating operations

#### Environmental Interest/Information System
- **RCRAInfo** is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Information System**

RCAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs). US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

  **Waste name:** ALUMINUM  
  **Amount (Lbs):** 2000

**Additional Notes:**

- **Waste code:** D002  
  **Waste name:** A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

The NEI database includes information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**CA WDS:**

- **Facility ID:** Santa Ana River 300117242
- **Facility Type:** Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water...

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relative minor impairment of beneficial uses compared to a major or minor threat. All nuns without a TWQ2 will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

#### Historical Generators:
- **Site name:** DATA ELECTRONIC SERVICES
- **Facility name:** DATA ELECTRONIC SERVICES
- **Classification:** Large Quantity Generator

#### Hazardous Waste Summary:
- **Waste code:** D002
  - **Waste name:** A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

- **Waste code:** F006
  - **Waste name:** WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

#### Biennial Reports:
- **Last Biennial Reporting Year:** 2011

#### Annual Waste Handled:
- **Waste code:** D002

**Environmental Interest/Information System**
- NCDDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

- California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

- US EPA TRIS (Toxics Release Inventory System) contains information on facilities release directly to air, water, land, or that are transported off-site.

- RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

- ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA’s programs. The vision for ICIS is to replace EPA’s independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all...

One Source Energy SVC Inc (Continued)

Orange County Central Utility Facility (Continued)

User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

Registry ID: 11002746554

Environmental Interest/Information System:
The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Water Systems can have one or more water system facilities. The water system will purchase water from several facilities. Drinking water information is stored in EPA’s SDWIS, which contains information about public water systems and their violations of EPA’s regulations for safe drinking water. These statutes and accompanying regulations establish maximum contaminant levels (MCL), treatment techniques, and monitoring and reporting requirements to ensure that water provided to customers is safe for human consumption.

- U.S. importer of hazardous waste: No
- Mixed waste (haz. and radioactive): No
- Recycler of hazardous waste: No
- Transporter of hazardous waste: No
- Treater, storer or disposer of HW: No
- Underground injection activity: No
- On-site burner exemption: No
- Furnace exemption: No
- Used oil fuel burner: No
- Used oil processor: No
- User oil reclaimer: No
- Used oil marketer to burner: No
- Used oil Specification marketer: No
- Used oil transfer facility: No
- Used oil transporter: No

**Evaluation Action Summary:**
- **Evaluation date:** 06/08/1994
- **Evaluation:** COMPLIANCE EVALUATION INSPECTION ON-SITE
- **Area of violation:** Not reported
- **Date achieved compliance:** Not reported
- **Evaluation lead agency:** State Contractor/Grantee

**FINDS:**
- Registry ID: 110002679780

**Environmental Interest/Information System (EIIIS):**
- **RCRA Info:** A national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, store, or dispose of hazardous waste. RCRA Info allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
- **CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System):** The Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

#### Handler Activities Summary
- U.S. Importer of hazardous waste: No
- Mixed waste (haz. and radioactive): No
- Recycler of hazardous waste: No
- Transporter of hazardous waste: No
- Treater, storer, or disposer of HW: No
- Underground injection activity: No
- On-site burner exemption: No
- Furnace exemption: No
- Used oil fuel burner: No
- Used oil processor: No
- User oil refiner: No
- Used oil marketer to burner: No
- Used oil specification marker: No
- Used oil transfer facility: No
- Used oil transporter: No

#### Historical Generators
- Date form received by agency: 11/06/2002
- Facility name: CARQUEST AUTO PARTS
- Site name: UNITED SYATT AMERICA CORPORATION
- Classification: Not a generator, verified

#### Hazardous Waste Summary
- Waste code: D004
- Waste name: ARSENIC
- Waste code: D005
- Waste name: BARIUM
- Waste code: D006
- Waste name: CADMIUM
- Waste code: D007
- Waste name: CHROMIUM
- Waste code: D008
- Waste name: LEAD
- Waste code: D010
- Waste name: SELENIUM
- Waste code: D011
- Waste name: SILVER

### Facility has Received Notices of Violations
- Regulation violated: FR - 262.50-60
- Area of violation: Generators - General
- Date violation determined: 02/12/1991
- Date achieved compliance: 02/12/1996
- Violation lead agency: EPA
- Enforcement action: Not reported
- Enforcement action date: Not reported
- Enforcement disposition status: Not reported
- Enforcement disposition status date: Not reported

### Evaluation Action Summary
- Evaluation date: 02/12/1991
- Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
- Area of violation: Generators - General
- Date achieved compliance: 02/12/1996
- Evaluation lead agency: EPA

### Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Intended Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Handler Activities Summary:**
- U.S. importer of hazardous waste: No
- Mixed waste (haz. and radioactive): No
- Recycler of hazardous waste: No
- Transporter of hazardous waste: No
- Treater, storer or disposer of HW: No
- Underground injection activity: No
- On-site burner exemption: No
- Furnace exemption: No
- Used oil processor: No
- Used oil refiner: No
- Used oil fuel marketer to burner: No
- Used oil Specification marketer: No
- Used oil transfer facility: No
- Used oil transporter: No

**Hazardous Waste Summary:**
- Waste code: D000
- Waste name: Not Defined
- Waste code: D011
- Waste name: SILVER

**FINDS:**
- No violations found

**Regulatory Information:**
- RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

---

**EDISON/SANTA ANA MGP**

**Manufactured Gas Plants (MGP):**

The former Santa Ana Manufactured Gas Plant (MGP) site is a contiguous property divided into western and eastern portions. The western portion of the site is currently occupied by a vacant industrial building. The eastern portion of the site is currently occupied by an active Southern California Edison electric substation. The site is presently surrounded by a commercial/municipal neighborhood within 350 feet of the site. A community hospital and a school are located approximately 1.5 miles from the site. Town gas plants were the primary source of household heating and lighting in the 1900s. Coal as well as oil were the raw materials used to manufacture gas products. By-products of this operation include tars and lampblack which contain polycyclic aromatic hydrocarbons (PAHs), volatile organic compounds (VOCs), and heavy metals.

Although hazardous waste management was not common practice in the early days, water separations and recylcing to recover and/or treat effluents may have been employed at town gas sites. However, incidences of spills and leaks may have also been common. Approximately 125 million cubic feet of gas were produced at the site during its years of operation. The western portion of the site currently occupies a vacant historical office building which is located in a business area that has undergone renovation. The city of Santa Ana plans to develop the building for commercial and business purposes.

**Notes:**
- The soil was taken to a hazardous waste disposal facility. Post excavation sampling was done to determine if soil removal was complete. A one foot diameter hole in the foundation of the building was sampled and filled with cement. An outdoor sump was also filled with cement. The building and site yard were resecured after the removal was completed.
- Site delisted 8/25/98.
- Site screening done; District Attorney initiated civil proceedings. Storage of cyanide & corrosive waste. Spill on pavement and ground. Site listed in BERP and CERCIS. Mitre Model required.

Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 1998-06-30 00:00:00
Comments: Completed an RI Report, 700 tons of contaminated soil (generated during RI) removed. This activity included a CAP and a fence.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 1992-03-20 00:00:00
Comments: RA Soils completed. Removal of approximately 50 cubic yards of soil contaminated with heavy metals. The soil was taken to a hazardous waste disposal facility. Post excavation sampling was done to determine if soil removal was complete. A one foot diameter hole in the foundation of the building was sampled and filled with cement. An outdoor sump was also filled with cement. The building and site yard were resecured after the removal was completed.

### Manufactured Gas Plants

**SO CAL GAS/SANTA ANA (MINNIE ST) MGP**

- Manufactured Gas Plants: 1008407772
- SANTA ANA, CA 92709

Manufactured Gas Plants:

- The site is on 1.50 acres located in the City of Santa Ana. It is currently occupied by a plastic related business. The majority of the site is paved and no evidence of any MGP related odors or visible residue remain. The Santa Ana site was inspects by DTSC staff on March 22, 1994. The site is currently occupied by a lumber company. The PEA Report dated December 1, 1992 (analytical) shows high levels of polyaromatic hydrocarbons and poly-nuclear aromatics, lead, and total petroleum hydrocarbons. The PEA recommended no emergency removal be conducted because of limited exposure to the substances at the site. Additional investigation, however, is recommended for the Site. Environmental impacts around the former concrete oil tank area. DTSC recommends that a low permeability fill be added to the planter boxes that have high levels of lead. The RWQCB may be concerned with the elevated levels of total petroleum hydrocarbons.

**Site Description:**

This site was a metals plating shop which improperly stored plating wastes. The containers deteriorated and wastes were spilled on the pavement and the ground. Wastes may also include cyanide and corrosive materials. The wastes are potentially toxic and may be corrosive upon direct contact.

**Hazardous Waste Desc:**

Heavy metals were stored onsite for long periods of time. The containers deteriorated and wastes were spilled on the pavement and the ground. Wastes may also include cyanide and corrosive materials. The wastes are potentially toxic and may be corrosive upon direct contact.

**Project Revenue Source Description:**

This site is being developed for cleanup funded by responsible parties with reimbursement to DHS for staff and related costs. However, if the responsible parties fail to provide funding for cleanup, another source of funds will need to be established.

**Site Activity Status:**

The Orange County Health Department has taken action to remove drummed metals. Metalls may migrate through the soil and into the ground water. Although the site is closed, there is potential for direct contact. Dissolved metals may migrate through the soil and into the ground water.

**Threat To Public Health & Env:**

The site description provides information on the potential threats to public health and the environment. This includes the types of contaminants present and their potential impacts.

**Hazardous Waste Desc:**

The description of hazardous wastes includes details on the types of materials found, their potential impacts, and the associated risks.

**Handler Activities Summary:**

- U.S. importer of hazardous waste: No
- Mixed waste (haz. and radioactive): No
- Recycler of hazardous waste: No
- Transporter of hazardous waste: No
- Treater, stern or disposal of HW: No
- Underground injection activity: No
- On-site burner exemption: No
- Furnace exemption: No
- Used oil fuel burner: No
- Used oil processor: No
- User oil refiner: No
- Used oil trucker to burner: No
- Used oil specification marketer: No
- Used oil transfer facility: No
- Used oil transporter: No

**Hazardous Waste Summary:**

- Waste code: D039
- Waste name: TETRACHLOROETHYLENE

**.handler Activities Summary:**

- U.S. importer of hazardous waste: No
- Mixed waste (haz. and radioactive): No
- Recycler of hazardous waste: No
- Transporter of hazardous waste: No
- Treater, stern or disposal of HW: No

**Hazardous Waste Summary:**

- Waste code: D039
- Waste name: TETRACHLOROETHYLENE

**Environmental Interest/Information System**

- California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

**RCRAInfo**

- RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**MAP FINDINGS**

**BEST BODY SHOP**

**RCRA-SOG:**
- Facility name: BEST BODY SHOP
- Facility address: 2220 W FIRST ST SANTA ANA, CA 92703
- EPA ID: CAD981423197
- Contact: Not reported
- Contact address: Not reported
- Contact phone: Not reported
- Contact email: Not reported
- EPA Region: 09
- Classification: Small Small Quantity Generator
- Description: Handler generates more than 100 and less than 1000 kg of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time

**Owner/Operator Summary:**
- Owner/operator name: UI H LEE
- Owner/operator address: NOT REQUIRED, ME 99999
- Owner/operator country: Not reported
- Owner/operator phone: (415) 555-1212
- Legal status: Private
- Owner/operator type: Owner
- Owner/Operator Start date: Not reported
- Owner/Operator End date: Not reported

**Historical Generators:**
- Used oil transporter: No
- Used oil transfer facility: No
- Used oil processor: No
- Used oil fuel burner: No
- Furnace exemption: No
- On site burner exemption: No
- Used oil fuel marketer to burner: No

**Handler Activities Summary:**
- U.S. importer of hazardous waste: No
- Mixed waste (haz. and radioactive): No
- Recycler of hazardous wastes: No
- Transporter of hazardous waste: No
- Treatment, storage, or disposal of HW: No
- Underground injection activity: No

**FINDS:**
- Violation Status: No violations found
- FINDS: 110002700845

**Environment:**
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, treat, store, or dispose of hazardous waste. RCRAInfo alerts RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

### ARCO #1047

**Address**: 2646 W 1ST STREET  
**City**: SANTA ANA  
**State**: CA  
**Zip Code**: 92703

**LUST**:

- **Region**: STATE  
- **Latitude**: 33.744960164  
- **Longitude**: -117.90496895  
- **Lead Agency**: SANTA ANA RWQCB (REGION 8)

**Site History**:

- Elevated TBA concentration across site (particularly northern portion) suggested possible release from modern tank system

**Potential Contaminants of Concern**:

- Gasoline

**Potential Media Affect**:

- Aquifer used for drinking water supply

**Click here to access the California GeoTracker records for this facility:**

**LUST**:

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

**FEDERAL RECORDS**

**NPL:** National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA’s Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/31/2011

Data Arrived at EDR: 04/13/2011

Date Made Active in Reports: 06/14/2011

Number of Days to Update: 62

Source: EPA

Telephone: N/A

Last EDR Contact: 04/13/2011

Next Scheduled EDR Contact: 07/25/2011

Data Release Frequency: Quarterly

**NPL Site Boundaries**

Sources:

- EPA’s Environmental Photographic Interpretation Center (EPIC)
  - Telephone: 202-564-7333

- EPA Region 1
  - Telephone: 617-918-1143

- EPA Region 3
  - Telephone: 215-814-5418

- EPA Region 4
  - Telephone: 404-562-8033

- EPA Region 5
  - Telephone: 312-886-6686

- EPA Region 10
  - Telephone: 206-553-8665

**Proposed NPL:** Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/31/2011

Data Arrived at EDR: 04/13/2011

**DELISTED NPL:** National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

LIENS 2: CERCLA Lien Information
A Federal CERCLA (Superfund) lien can exist by operation of law at any site or property at which EPA has spent Superfund moneys. These moneys are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date Data Arrived at EDR: 03/11/2011

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time.

<tr>
<td><strong>US BROWNFIELDS</strong>: A Listing of Brownfields Sites</td>
<td>Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities—especially those without EPA Brownfields Assessment Demonstration Pilots—minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the county. Targeted Brownfields Assessments supplement work with other efforts under EPA’s Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients, States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.</td>

**LUST**: Geotracker’s Leaking Underground Fuel Tank Report
Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state. For more information on a particular leaking underground storage tank site, please contact the appropriate regulatory agency.

The Department of Toxic Substances Control’s (DTSC’s) Site Mitigation and Brownfields Reuse Program’s (SMBRP) EnviroStor database contains information that is used to assess potential impacts to public health and the environment at contaminated sites. A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab material was or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

Source: Department of Toxic Substances Control

ENVIROSTOR: EnviroStor Database

A list of registered waste tire haulers.

Source: Integrated Waste Management Board

HAULERS: Registered Waste Tire Haulers Listing

The database includes the following sites types: Federal Superfund sites (National Priorities List (NPL)), State Response, including Military Facilities and State Superfund, Voluntary Cleanup, and School sites. EnvirStor provides similar information to the information that was available in CalSites, and provides additional site information, including but not limited to, identification of formerly contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Source: Department of Toxic Substances Control

ENVIRSTOR: EnvirStor Database

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Source: Department of Toxic Substances Control

RESPONSE: State Response Sites

Facility and Manifold Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 550,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

Source: California Environmental Protection Agency

DEED: Deed Restriction Listing

A listing of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaner's agents; linen supply; co-op operated laundries and cleaning; drycleaning plants, except rugs; carpet and upholstery cleaning; industrial laundromats; laundry and garment services.

Source: California Air Resources Board

EMI: Emissions Inventory Data

A list of Well Investigation Program cases in the San Gabriel and San Fernando Valley area.

Source: Los Angeles Water Quality Control Board

WP: Well Investigation Program Case List

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The data contains some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

Source: California Environmental Protection Agency

HAZNET: Facility and Manifold Data

CDL: Clandestine Drug Labs

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

HHAZ: Facility and Manifest Data
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR’s researchers. Manufactured gas plants were used in the United States from the 1800’s to 1950’s to produce gas that could be distributed and used as fuel. These plants used whale oil, resid, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (olive waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

INDIAN UST R10: Underground Storage Tanks on Indian Land

Date of Government Version: 05/10/2011
Data Made Active in Reports: 06/14/2011
Number of Days to Update: 26
Data Release Frequency: Quarterly

INDIAN UST R9: Underground Storage Tanks on Indian Land
The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 9 (Arizona, California, Hawaii, Nevada, the Pacific Islands, and Tribal Nations).

Date of Government Version: 05/18/2011
Data Made Active in Reports: 06/14/2011
Number of Days to Update: 19
Data Release Frequency: Quarterly

INDIAN UST R8: Underground Storage Tanks on Indian Land
The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 8 (Colorado, Montana, North Dakota, South Dakota, Utah, Wyoming and 27 Tribal Nations).

Date of Government Version: 05/16/2011
Data Made Active in Reports: 06/14/2011
Number of Days to Update: 28
Data Release Frequency: Quarterly

INDIAN UST R7: Underground Storage Tanks on Indian Land
The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 7 (Iowa, Kansas, Missouri, Nebraska, and 9 Tribal Nations).

Date of Government Version: 04/02/2011
Data Made Active in Reports: 06/14/2011
Number of Days to Update: 13
Data Release Frequency: Various

INDIAN UST R6: Underground Storage Tanks on Indian Land
The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 6 (Louisiana, Arkansas, Oklahoma, New Mexico, Texas and 65 Tribes).

Date of Government Version: 05/10/2011
Data Made Active in Reports: 06/14/2011
Number of Days to Update: 34
Data Release Frequency: Semi-Annually

INDIAN UST R5: Underground Storage Tanks on Indian Land
The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 5 (Michigan, Minnesota and Wisconsin and Tribal Nations).

Date of Government Version: 01/01/2011
Data Made Active in Reports: 05/02/2011
Number of Days to Update: 68
Data Release Frequency: Various

INDIAN UST R4: Underground Storage Tanks on Indian Land
The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 4 (Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee and Tribal Nations).

Date of Government Version: 03/03/2011
Data Made Active in Reports: 06/14/2011
Number of Days to Update: 45
Data Release Frequency: Semi-Annually

INDIAN UST R3: Underground Storage Tanks on Indian Land
The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 3 (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont and ten Tribal Nations).

Date of Government Version: 03/07/2011
Data Made Active in Reports: 06/14/2011
Number of Days to Update: 41
Data Release Frequency: Various

INDIAN UST R2: Underground Storage Tanks on Indian Land

Date of Government Version: 03/03/2011
Data Made Active in Reports: 06/14/2011
Number of Days to Update: 70
Data Release Frequency: Various

INDIAN UST R1: Underground Storage Tanks on Indian Land
The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 1 (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont and ten Tribal Nations).

Date of Government Version: 03/07/2011
Data Made Active in Reports: 06/14/2011
Number of Days to Update: 41
Data Release Frequency: Various

INDIAN VCP R1: Voluntary Cleanup Priority Listing
A listing of voluntary cleanup priority sites located on Indian Land located in Region 1.

Date of Government Version: 02/25/2011
Data Made Active in Reports: 06/14/2011
Number of Days to Update: 27
Data Release Frequency: Various

INDIAN VCP R7: Voluntary Cleanup Priority Listing
A listing of voluntary cleanup priority sites located on Indian Land located in Region 7.

Date of Government Version: 03/20/2008
Data Made Active in Reports: 06/19/2008
Number of Days to Update: 13
Data Release Frequency: Various

Other Database(s):  
Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

REQUEST FOR ENVIRONMENTAL HEALTH RECORDS

The undersigned hereby requests a copy of the records prepared and maintained by the Health Care Agency in the ordinary course of business, at or near the time of the act, condition, or event which they depict.

The records requested are maintained under the Public Records Act Government Code § 6250 – 6276.48. Some information held in the documents may be exempt from release pursuant to the Public Records Act.

The undersigned understands that the Health Care Agency will charge $0.15 per page copied. In the case of a request for a large number of copies, the Health Care Agency may provide the requestor an estimate of copy costs prior to making said copies. If any request is to be canceled, this office must be notified at the above number within ten (10) days of receipt of request, otherwise cost incurred will be charged to the undersigned.

In order to assist you, please describe the reason for your request:

Phase 1  ESA

Please list addresses here (no more than 10 addresses per request):

May 10, 2000

Ms. Souri Amirani, Senior Engineer
City of Santa Ana, Public Works Agency
P.O. Box 1988
Santa Ana, CA 92702

SUBJECT: REMOVAL OF AN UNDERGROUND STORAGE TANK
CITY OF SANTA ANA - PUBLIC WORKS AGENCY
20 CIVIC CENTER PLAZA, SANTA ANA

Dear Ms. Amirani:

We have reviewed the January 7, 2000 (received on April 20, 2000), report titled Removal of Underground Storage Tank. This report was prepared and submitted by your consultant, TAIT Environmental Management, Inc. (TAIT). It is our understanding that the City of Santa Ana Fire Department (SAFD) referred this site’s recent sampling analytical results to this office for our review and recommendations.

In December 1999, one (1) 1,000-gallon steel underground storage tank (UST) was removed at the subject site. The UST was used as a diesel fuel storage for an emergency generator. During the tank removal activities, under the direction of the SAFD, it was noted that the UST was in good condition and that groundwater was not encountered. At that time, a total of five (5) soil samples (TP1 through TP5) were collected.

The five soil samples were analyzed by EPA Methods 8015B and 8021 for total petroleum hydrocarbons for both diesel and gasoline (TPH-d and TPH-g), benzene, toluene, ethylbenzene, xylenes (BTEX), and methyl-tertiary butyl ether (MTBE), respectively. No benzene or MTBE contamination concentrations were detected in any of the samples. Minor levels of contamination were detected in the following samples:

<table>

</tr>
</tbody>
</table>
Based on these soil results, this office requires no further investigation or remediation of the former diesel tank area.

If you have any questions, please call me at (909) 782-4497.

Sincerely,

Nancy Olson-Martin
Sanitary Engineering Associate

RE: Notice to Begin Work as Stated in Work Plan for Remediation and Confirmatory Sampling at  
Reed Thomas Construction – 1025 North Santiago Street, Santa Ana, California

Dear Mr. Biegle,

It has been nine months since the approval of the work plan to remediate by excavation and take  
confirmation samples from the excavation. The Santa Ana Fire Department’s records indicate none of the  
approved work has started. The work is to begin no later than 30 days from today’s date. Contact the  
Santa Ana Fire Department to schedule the required inspections.

If you have any questions call me at (714) 647-5761.

Sincerely,

Reed Thomas Co., Inc., 1025 North Santiago Street, Santa Ana, California

Dear Mr. Beigle:

In accordance with your request, we have prepared this work plan to supervise over-excavation procedures and perform confirmatory sampling for diesel fuel impacted soil at the referenced address. This investigation is required by the City of Santa Ana Fire Department.

The opportunity to provide this service is greatly appreciated. If you have any questions regarding this matter, please feel free to call our office at (714) 996-5151.

Sincerely,

Dear Mr. Biegle:

Subject: Work Plan for Remediation and Confirmatory Sampling
Reed Thomas Construction, 1025 North Santiago Street, Santa Ana CA 92701

I have read the work plan for remediation and confirmatory sampling prepared by Advanced Geoenvironmental, Inc. dated November 17, 1999 for 1025 N. Santiago Street in Santa Ana. The Santa Ana Fire Department approves the work plan with the following requirement.

- All samples with MTBE contamination shall be confirmed by EPA method 8260 (FULL SCAN including all oxygenates and MTBE).

If you have any questions or concerns, please call me at (714) 647-5761.

Sincerely,

JAY BENTO, UST INSPECTOR

Santa Ana, California

Responsible Party: Reed Thomas Co., Inc.
1025 North Santiago Street
Santa Ana, California
Attn: Mr. Harvey Biegle/Mr. Rich Beigle

1.2. GENERAL SITE CHARACTERISTICS

1.2.1. Location

The subject property, located at 1025 North Santiago Street, Santa Ana, California, lies on the east side of Santiago Street between Santa Ana Boulevard and Washington Avenue. The site is located in a commercial area of moderate topographic relief at an approximate elevation of 140-feet above sea level (*Figure 1 - Location Map, 7.5-Minute Orange Quadrangle, USGS Topographic Series, 1981*).

1.2.2. Site Description and Current Use

The subject property is currently occupied by Reed Thomas Co., Inc. and is utilized as a construction yard and offices for the company. There are no known plans to change the property usage in the near future.

*Advanced GeoEnvironmental, Inc.*
17 November 1999
AGE Project No. OC 829G2.745
Page 2 of 5

1.3. ENVIRONMENTAL SETTING

1.3.1. Regional and Local Geology

According to the California Department of Conservation, Division of Mines and Geology Geologic Map of the Santa Ana Quadrangle (1991, scale 1:100,000), the site is located within the Southern Los Angeles Basin Geomorphic Province. The property is situated on undivided alluvial deposits, consisting of unconsolidated gravel, sand and silt, deposited by the ancient Santa Ana River.

1.3.2. Ground and Surface Water Information

According to the California Department of Water Resources (CDWR) publication titled California’s Ground Water (1975), Bulletin 118, the subject property lies within the Coastal Plain of Orange County ground water basin. According to the Orange County Water District’s Ground Water Contour Map, November 1996, the depth to the deeper aquifer is approximately 40 feet below surface grade (bsg), flowing to the southwest. The water in this basin is relied upon extensively for irrigation, municipal and industrial uses.

The Santa Ana River, a southwest-flowing stream terminating at the Pacific Ocean, is located 2½ miles west of the subject property. No other major surface water body is located within a ½-mile radius of the subject property.

1.4. UNDERGROUND STORAGE TANK REMOVAL

The following information is summarized from AGE’s report titled Soil Sampling Related to the Removal of an Underground Storage Tank, dated 19 July 1999:

- A single underground storage tank (UST) was located on the property. The UST was a 10,000-gallon single-walled steel tank used to store diesel fuel.
- The UST was removed on 30 June 1999. Six soil samples were collected from the tank excavation. Total petroleum hydrocarbons as diesel (TPH-d) were detected in three of the samples collected from the excavation, ranging from 4,363 mg/kg in sample T1-N7’ to 6,927 mg/kg in sample T1-W7’. Samples collected from the floor of the excavation (T1-N13’ and T1-S13’) did not contain any detectable hydrocarbon compounds. The sample locations are depicted on Figure 2 - Site Plan and the results are summarized on Table 1.

In a letter dated 02 August 1999, the City of Santa Ana Fire Department (SAFD) required a work plan for further investigation at the property.

Advanced GeoEnvironmental, Inc.
17 November 1999  
AGE Project No. OC 829G2.745  
Page 3 of 5

1.5. SCOPE OF WORK

The scope of work is to remove the hydrocarbon impacted soil through excavation. The impacted soil will then be transferred to an appropriate soil recycling facility for disposal. The removal of the impacted soil and the establishment of a 30-foot clean zone below the deepest point of soil impact will be obtained through the placement of three probe borings around the impacted area to the appropriate depth.

2.0. PROCEDURES

2.1. PROJECT PREPARATION

1. Determine location of underground utilities utilizing Underground Services Alert and any plans supplied by site occupants.

2. Prepare a site safety and health plan using OSHA guidelines for performing work on hazardous material sites.

3. Notify the SAFD a minimum of 5 days prior to work initiation.

2.2. FIELD PROCEDURES

2.2.1. Excavation of Impacted Soil

1. Prior to work initiation, brief all personnel on contents of site safety and health plan.

2. Following concrete removal, excavate the soil utilizing a backhoe.

3. Monitor removed soil for organic vapor using an organic vapor meter (Bacharach TLV Sniffer, calibrated to hexane).

4. Guided by organic vapor readings and visual observations, obtain two sample from each side wall and four to six samples from the floor of the excavation to confirm the successful removal of contaminated soils. The approximate dimensions of the excavation are depicted on Figure 3.

5. Obtain all soil samples from the backhoe bucket utilizing precleaned 2 x 3-inch brass sleeves. Cover both ends of the brass tubes with aluminum foil or Teflon sheets and cap both ends.

6. Relinquish soil samples to an on-site, state-certified mobile laboratory for analysis.

*Advanced GeoEnvironmental, Inc.*
7. Analyze samples for total petroleum hydrocarbons as diesel (TPH-d) in accordance with EPA method 8015m. Also analyze the soil samples for purgeable aromatic hydrocarbons (BTE&X) with methyl tert-butyl ether (MTBE) in accordance with EPA method 8020.

8. Stockpile the hydrocarbon-impacted soil on-site temporarily prior to transport. Use a backhoe or a loader to transfer the soil into transport vehicles to an approved soil recycling facility.

2.2.2. Soil Borings

9. Advance three borings around the former tank excavation (to the north, east and west) to a minimum depth of 30-feet below the deepest point of the removed impacted soil utilizing direct push drilling methods (Geoprobe). Borings will not be placed in the previous excavation since the excavation was partially filled with concrete, and the samples collected from the excavation floor did not have detectable levels of hydrocarbons. Additionally, borings will not be placed at the southern end of the excavation since there was no hydrocarbon impact. The approximate location of the proposed soil borings are depicted on Figure 3. The actual location of the borings will be determined after over-excavation procedures are completed.

10. Obtain discrete soil samples at 5-foot intervals to the appropriate depth. The samples will be collected using a core sampler loaded with precleaned brass tubes.

11. Preserve the samples by covering both ends with aluminum or Teflon sheets and caps. Place samples in a chilled container for transport to a state-certified laboratory for analysis.

12. Describe soil in sample duplicates in accordance with the Unified Soil Classification System (USCS).

14. If ground water is encountered, obtain grab ground water samples in the three borings using a hydropunch or temporary well point method. Place each sample in one 1-l amber jar and two 40-ml EPA VOA vials.

15. Decontaminate sampling equipment in a phosphate-free detergent solution and rinse twice with water prior to each sampling run.

16. Backfill probe holes using hydrated bentonite chips and seal the upper 4 inches with concrete.

17. Analyze the soil and ground water samples for total petroleum hydrocarbons as diesel (TPH-d) in accordance with EPA method 8015m. Also analyze the soil samples for purgeable aromatic hydrocarbons (BTE&X) with methyl tert-butyl ether (MTBE) in accordance with EPA method 8020.

Advanced GeoEnvironmental, Inc.
2.3 PROJECT PREPARATION

18. Prepare a report, detailing the results of the work in a format acceptable to the SAFD and the CRWQCB, signed with a wet ink signature of a California Registered Geologist.

RE: RESPONSE TO “SOIL SAMPLING FOLLOWING THE REMOVAL OF AN UNDERGROUND STORAGE TANK” REPORT DATED JULY 19, 1999

Dear Mr. Beigle:

I have read the “Soil Sampling Following the Removal of an Underground Storage Tank” report that was prepared by Advanced GeoEnvironmental, Inc. The information in the report indicates an unauthorized release of petroleum hydrocarbons has occurred from your former underground storage tank. Based on the report further investigation is required to delineate the lateral and vertical extent of the petroleum hydrocarbon contamination. Please submit a Phase II work plan to the Santa Ana Fire Department by September 30, 1999.

Please have your environmental consultant send a copy of the above mentioned report, as well as all future reports, to the Regional Water Quality Control Board (Attn: Ken Williams) at 3737 Main Street, Suite 500, Riverside, CA 92501-3339.

If you have any questions, please call me at (714) 647-5761.

Sincerely,

Lester Haug  
ECCO Equipment  
1417 N. Susan Street  
Santa Ana, CA  92703

SUBJECT: CLOSURE OF UNDERGROUND STORAGE TANK (UST) CASE  
ECCO EQUIPMENT COMPANY  
1417 N. SUSAN STREET, SANTA ANA, CA  
CASE NO. 083001928T

Dear Mr. Haug:

This letter confirms the completion of the site investigation, remedial action and groundwater monitoring which were required to mitigate the release(s) from the underground storage tanks formerly located at the above described location. Enclosed is the Case Closure Summary for the referenced site for your records.

Three USTs were excavated and removed. Moderate to high concentrations of petroleum hydrocarbons were detected below the two diesel USTs. Additional soil was removed from the excavation. Three groundwater monitoring wells were installed and sampled. BTEX and TPH were not detected in the soil samples collected. Only very low concentrations of 1,1,1 trichloroethane were detected in the groundwater samples collected.

Based on the available information, including the current land use, and with the provision that the information provided to this agency was accurate and representative of site conditions, no further action related to the underground storage tank release is required.

This notice is issued pursuant to a regulation contained in Title 23, California Code of Regulations, Division 3, Chapter 16, Section 2721 (e).

The monitoring wells located at the site are required to be properly abandoned in accordance with the California Well Standards. In addition, all necessary permits from the appropriate agencies are required to be obtained prior to decommissioning the monitoring wells. After the monitoring wells are properly abandoned, please submit all documentation to this agency.
Please telephone Patricia Hannon at (909) 782-4498 if you have any questions regarding this matter.

Sincerely,

[Signature]

Gerard J. Thibeault
Executive Officer

Ms. Marla D. Guensler, Territory Manager
Exxon/Mobil Refining & Supply Company
3700 W. 190th Street, TPT #2-7
Torrance, CA 90509

SUBJECT: No Further Action
Former Exxon Station 7-3117
1501 East Edinger Avenue, Santa Ana
Regional Board Case #083002041T

Dear Ms. Guensler:

This letter confirms the completion of site investigation and remedial action for the underground storage tanks at the above described location. The City of Santa Ana Fire Department (SAFD) had closed this case on August 1, 1995. However, this case was never closed on our leaking underground storage tank database.

The SAFD closed the case based on the results of a soil vapor extraction system that was operated at the site from June 1994 to March 1995, and the subsequent confirmation soil sampling. A groundwater investigation was not conducted even though groundwater was encountered at an approximate depth of 30 feet bgs.

In 1995, Unocal installed two groundwater monitoring wells (MW-20 and MW-21) adjacent to the former Exxon station as part of their ongoing groundwater investigations at their 1502 Edinger Ave. facility. MTBE was initially detected in MW-21 at a concentration of 690 ug/l. Since the groundwater gradient fluctuated between the northeast to the southeast, it was not possible to distinguish whether the MTBE was from releases from the former Exxon or the Unocal site. However, since 2002, the concentration of MTBE detected in MW-29 (replacement well for MW-21) has been low to non-detect. Therefore, it appears that past discharges at the site have not significantly impacted the groundwater in the vicinity of Edinger Avenue and we are not requiring Exxon Mobil to conduct a groundwater investigation at their former site.

Based on the available information, including the current land use, and with the provision that the information provided to this agency was accurate and representative of site conditions, no further action related to the underground storage tank release is required.

This notice is issued pursuant to a regulation contained in Title 23, California Code of Regulations, Division 3, Chapter 16, Section 2721(e).

INFORMATION REQUEST

TO: Ms. Julie Johnson  
    File Coordinator

FROM: Janet Tensler

SUBJECT: Information Request

URS Corporation hereby requests any information regarding environmental permits, surveillance, complaints, or violations maintained in your files for the following site(s). We are also interested in obtaining any information about soil or groundwater assessments or remediation, or the use, storage, disposal, or release of hazardous or regulated substances or wastes for the site(s).

SEE ATTACHED LIST

This information will be used for a Phase I-Environmental Site Assessment. Please feel free to contact me at (714) 433-7687, if you have any questions.

Sincerely,

Janet Tensler
Senior Environmental Scientist
October 12, 2011

Janet Tentler
URS CORPORATION
2020 1st Street, #400
Santa Ana, CA 92705

PR#41004111

Dear Ms. Tentler:

The Department of Toxic Substances Control has received your letter to review records under the Public Records Act.

After a thorough review of our files we have found no such records exist at this office pertaining to the facility referenced above.

If you have any questions, or would like further information regarding your request, please contact our Regional Records Coordinator at (714) 484-5337.

We would like to inform you about Envirostor, a database that provides information and documents on over 5,000 DTSC cleanup sites. EnviroStor can be accessed at: http://www.envirostor.dtsc.ca.gov/public. Also, a computer is available in the Central Files of each DTSC Regional Office for use by community members to view EnviroStor.

Sincerely,

[Signature]

Julie Johnson
Regional Records Coordinator
